BORN A PIONEER

GAN V100

Magnetic Levitation

35° Self-Aligning

Omni-Support Spherical Orbit

72 Handfeels

55mm Compact Size

64g Featherlight 64g

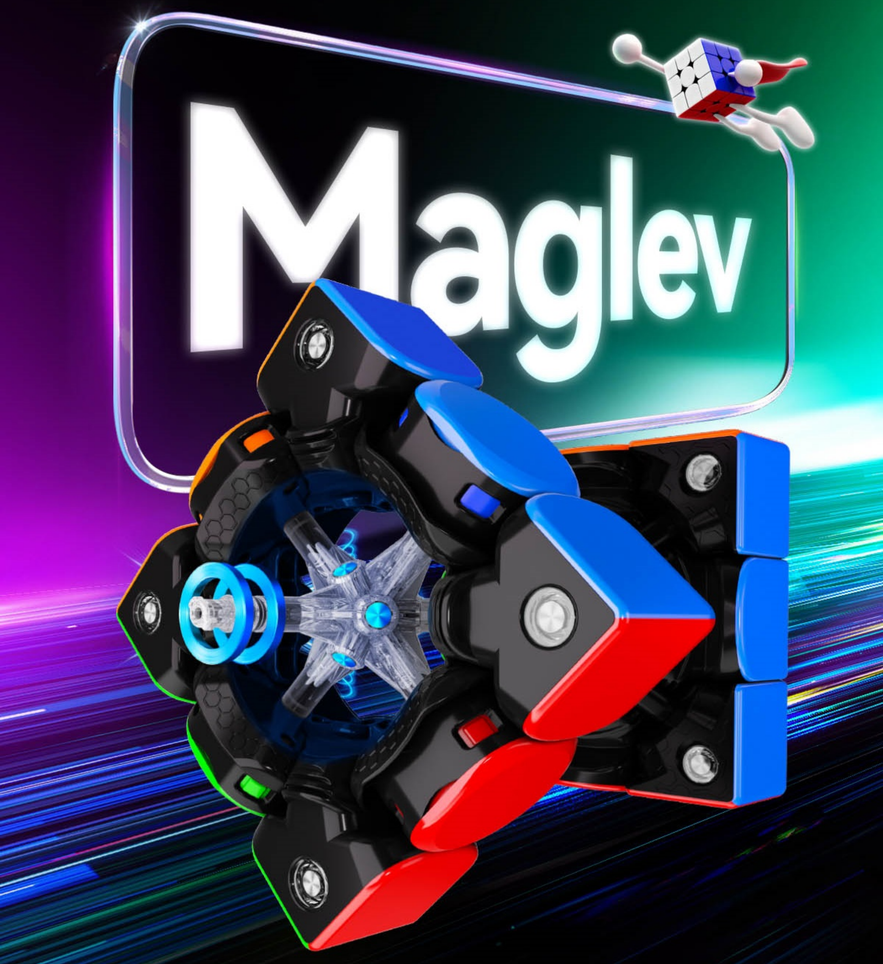

GO, MAKE YOUR MARK

Go, show off that genius move.
Go, leave your rivals in the dark.
Go, set the world a brand-new record.
Go, make your name on the rankings.
Go, claim the cheers and thunderous applause.
Go fight, go win, go soar.
Born a Pioneer.

Omni-Directional Positioning

Maglev
Levitated. Lifted. Leveled.

76 Magnets

Bow down to 3D magnetic sensing

Linear 3D magnetic power, covering from core to pieces, accelerates your start and also victory.

Magnet Attraction & Repulsion

Warning: No slowing

Magnet repulsion - Levitation. Magnet attraction - Alignment. With the maglev double drive, PB updated anytime.

Magnetic GES

Magnetic floating charm

Dual ring magnets have been “cast the floating charm permanently” — magnetic levitation. Each turn is Magical with no jam or noise!

35° Self-Aligning

Drifting on cube

I always automatically drift in aligning. Each faster move matters.

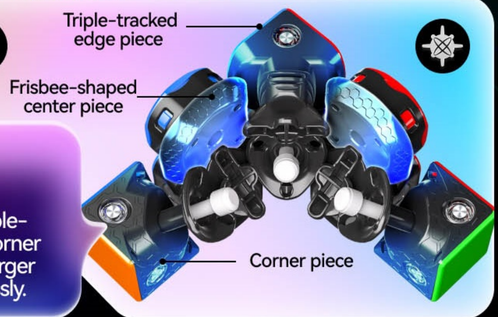

*35°Self-aligning is a feature of GAN V100 Maglev. Other versions vary.

Omni-Support Spherical Orbit

They Call Me CORNERSTONE

Omni-Support Orbit

Squad goals
Maximum support

Frisbee-shaped center pieces, triple-tracked edge pieces and classic corner pieces. Supporting surfaces are larger than ever while matching seamlessly.

Hollow Design

Resistance?
None of my business

My hollow design already tackled contact and friction issues. We're ready to take off anytime.

Flexible Space

Flexible enough
Say bye to lockup

I got any speed covered with ample flexible space between pieces. Say bye to lockup!

64g Ultralight Design

Speed isn't the Goal It's the Natural Result

55mm

Compact at 55mm

Small size But big league

Controlling the small cube is controlling everything. Yes. Including speed and victory.

55mm

Featherlight 64g

Let me shed light on —lightness

Top configurations. Few frictions. Strong control. Lightness brings lightning speed.

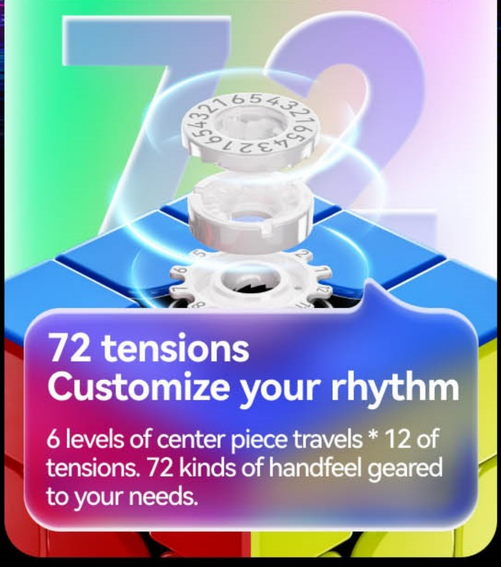

Numerical Tuning

Your Handfeel, Your Freedom

Pioneering the Future of Customizable Performance

Geared in Gears

72 tensions
Customize your rhythm

6 levels of center piece travels * 12 of tensions. 72 kinds of handfeel geared to your needs.

Customize Tuning Tools

Tune in one step

Gear-shift style of tuning. Quick and precise.

Pioneer Speeding Design

Speed Coded in Genes

90° Full Corner-Cutting

One take with no cuts

Contact Face of Honeycomb & Tracks

Smooth. Not just on tongue.

Snap-in Splicing

Strong enough for heads-on

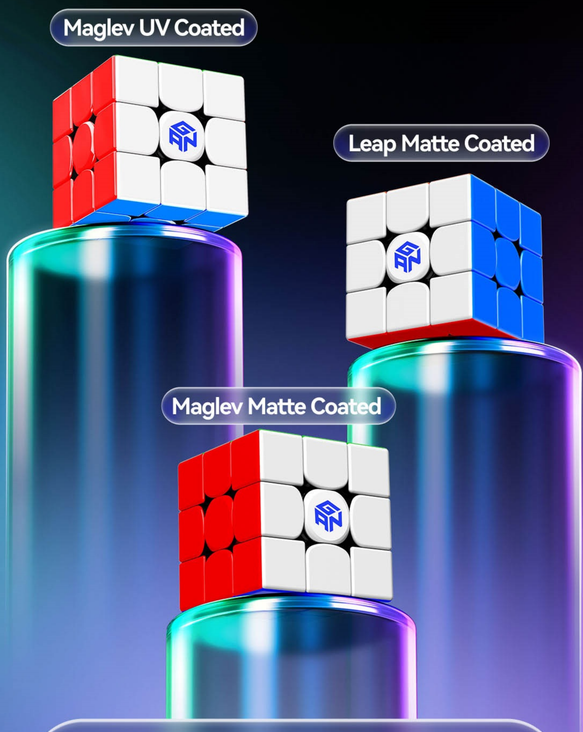

Black Inner Surface

Hardcore Aesthetics

Rock the game. Leave your rivals in the dark!
