Magnetic Positioning

Adjustable Tension

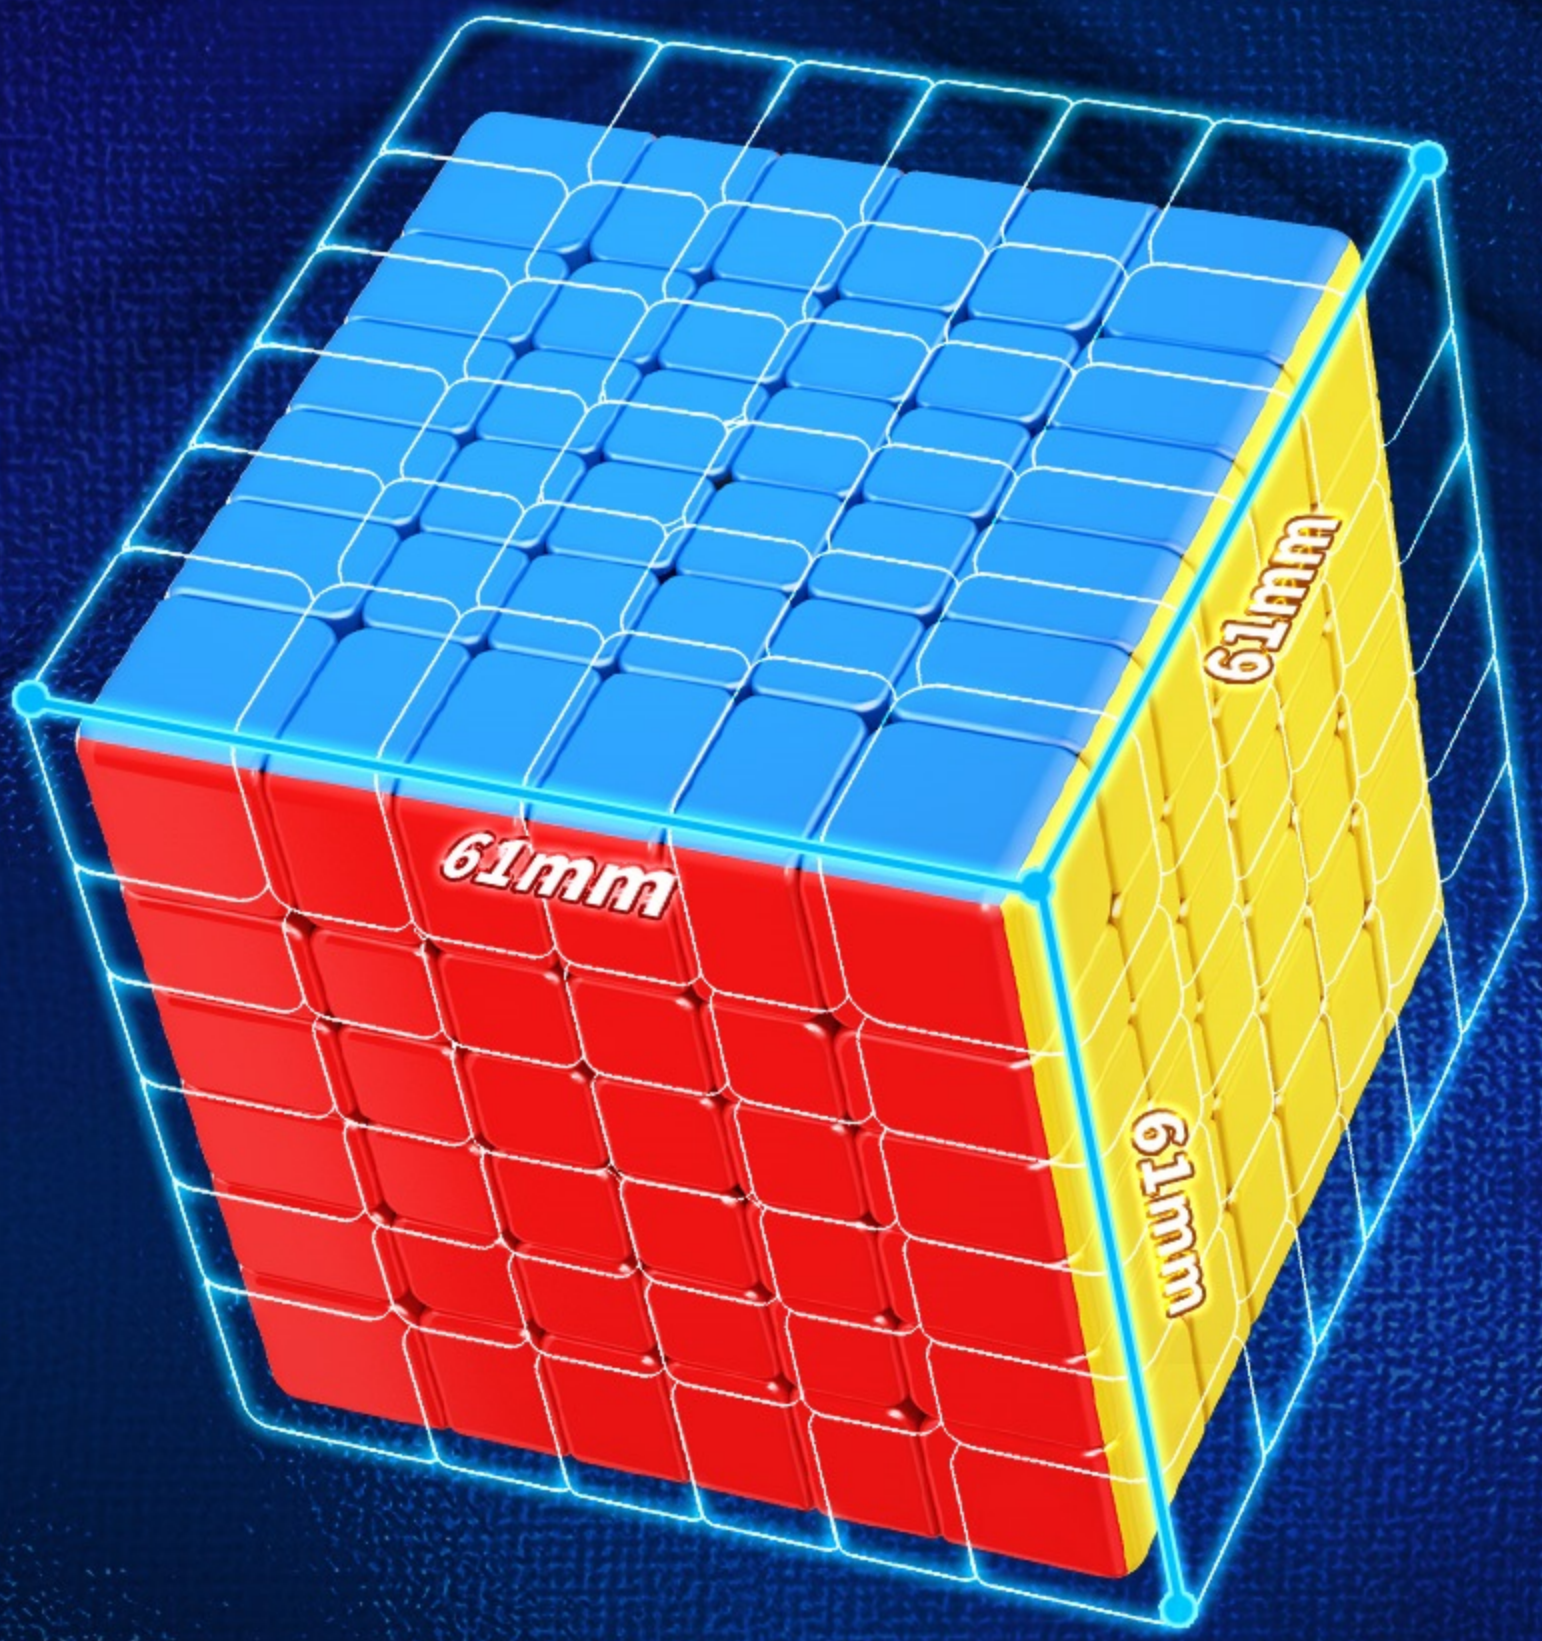

Stable Structure

Smooth Feel

Product introduction

# Reduce size

The 4mm difference is not only a reduction in size,
but also a change in speed compared to the previous generation
of Meilong 6. The 4mm reduction in size brings more flexible control,
greatly improving the Cube feel

Product introduction

# Magnetic Positioning System

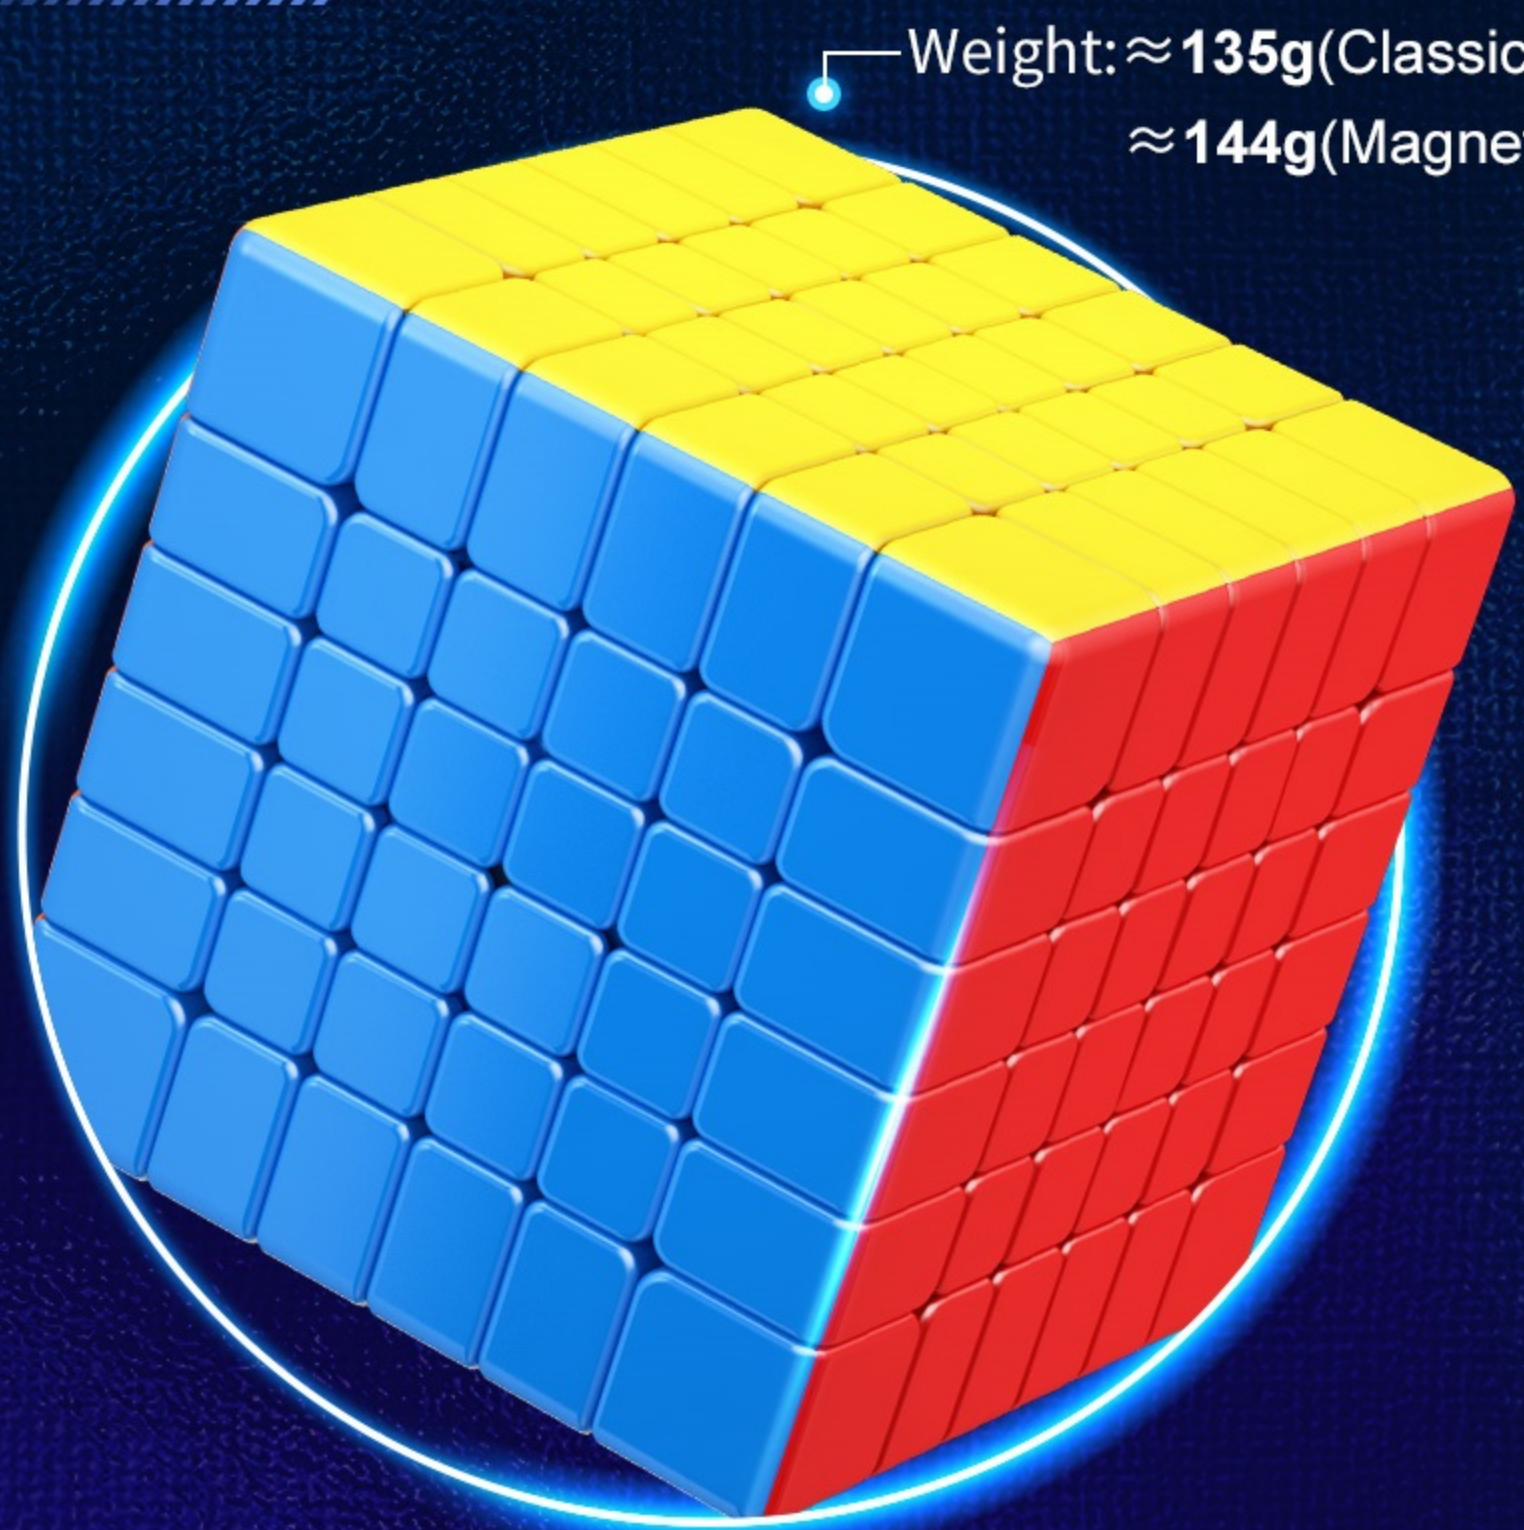

144 magnets are placed inside the cube.
Say no to magnets lose, easy to line up the layers.
The cube has a great maneuverability.

Product introduction

# Lightweight Structure

While making the cube powerful enough,
reducing the weight of the cube, making the cube more smooth and stable.

Product introduction

# Structural design

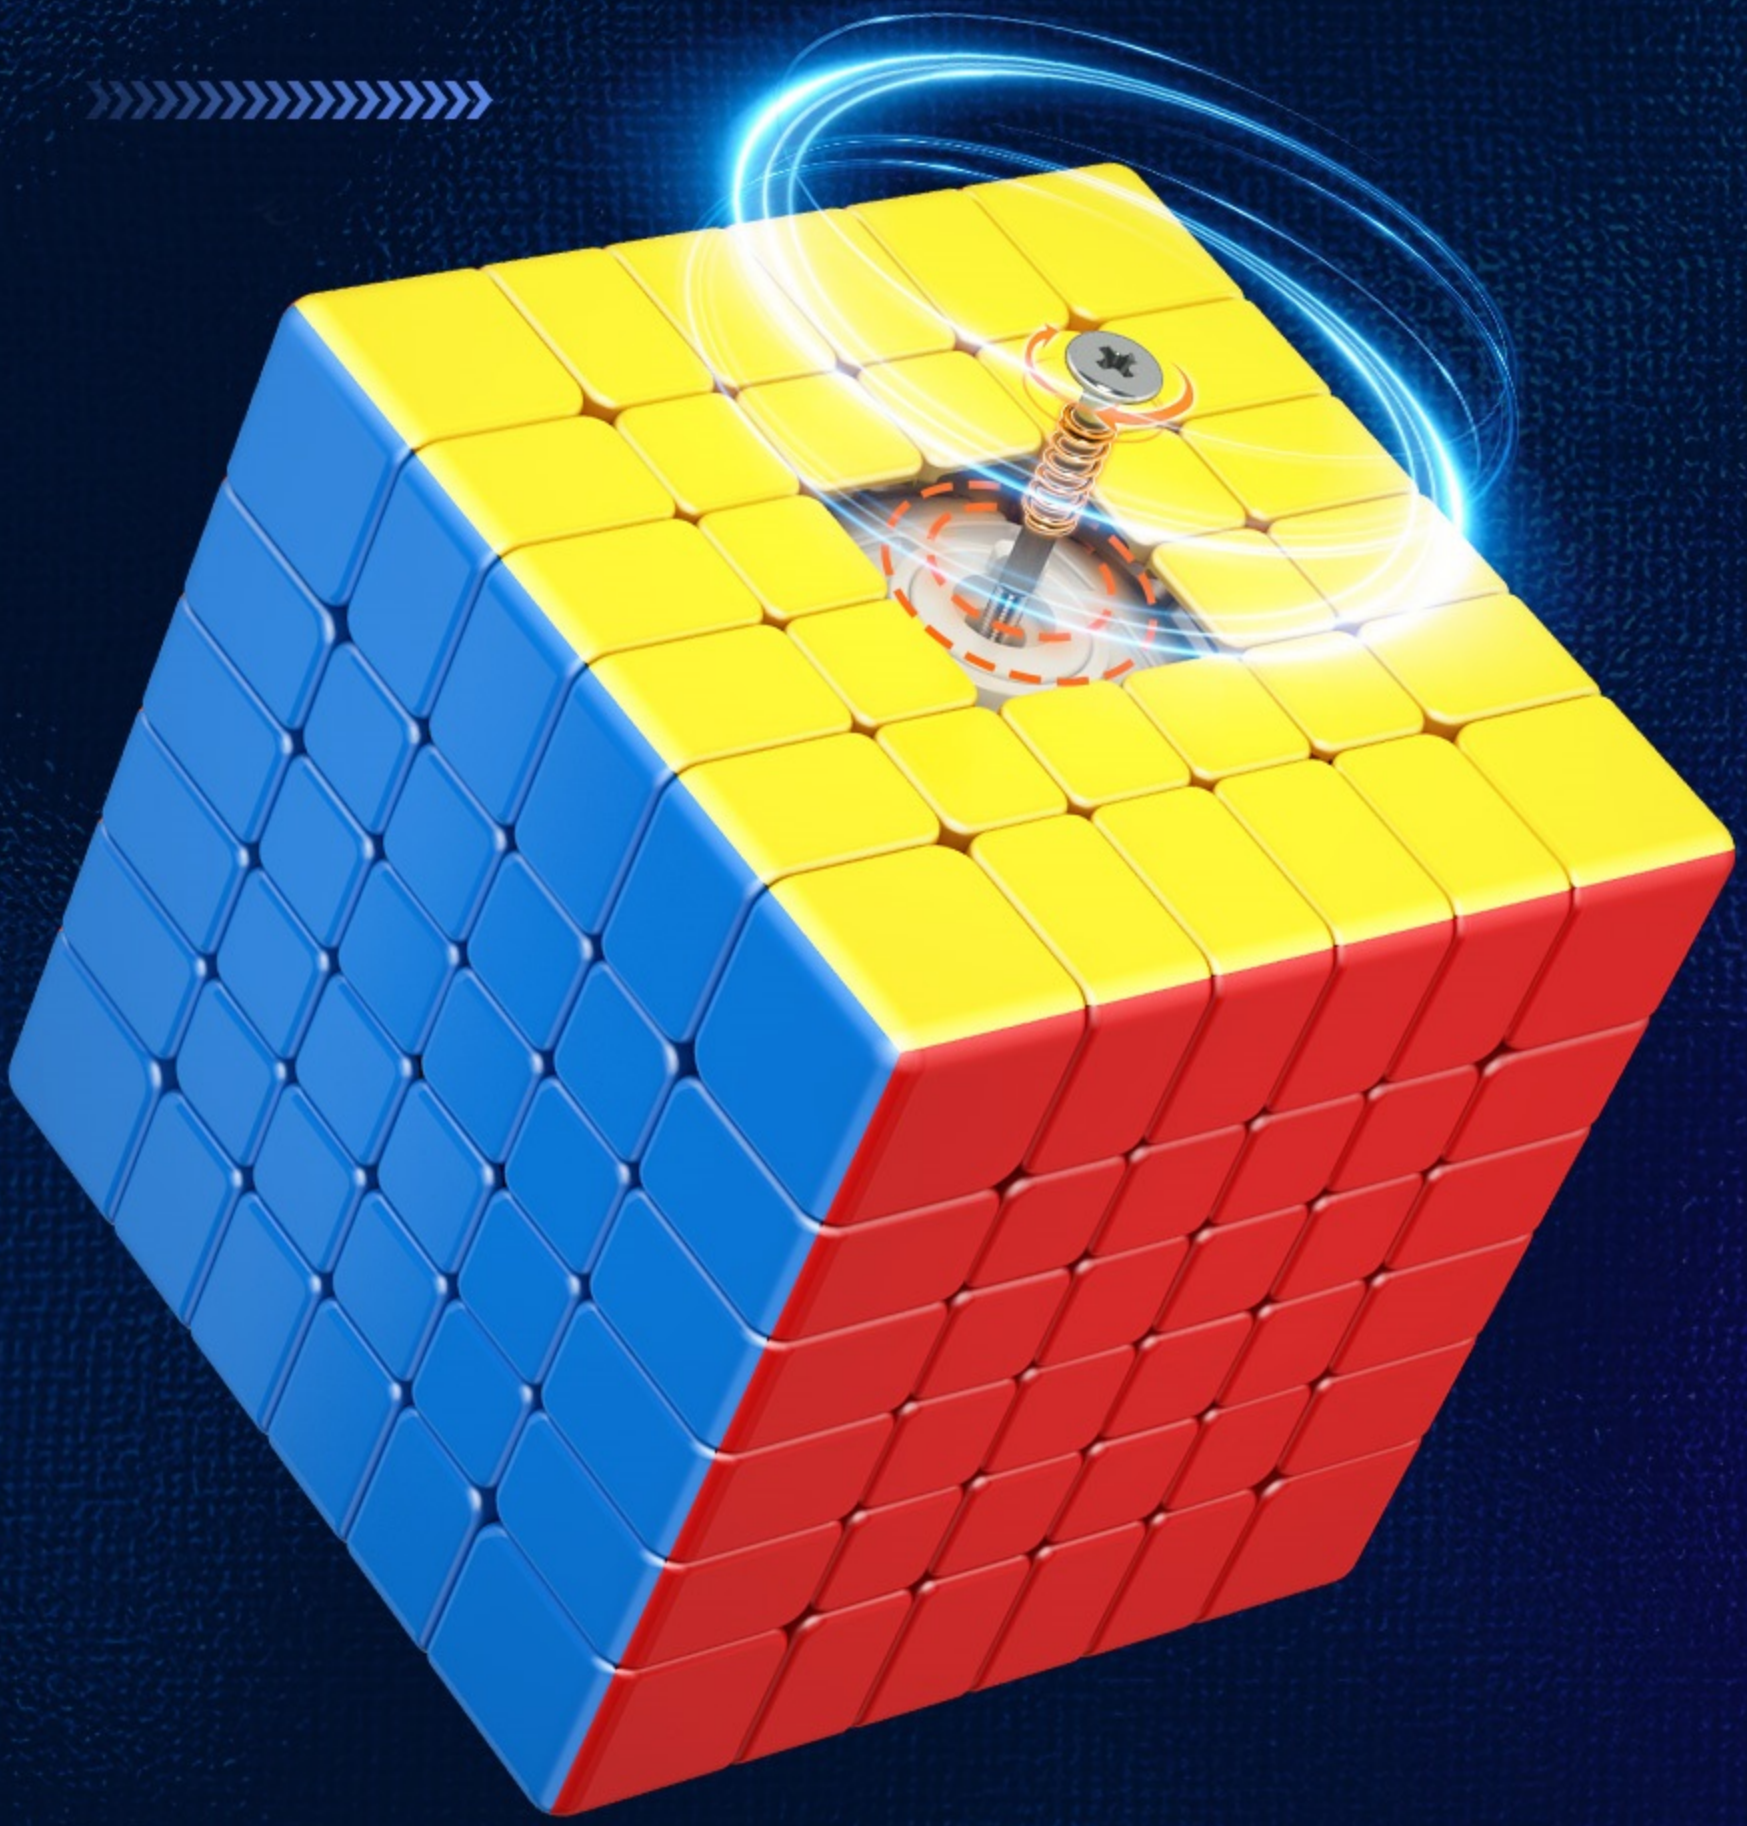

Accessories are integral molding, no cover design, the overall size of the Rubik's cube smaller, lighter, more comfortable sense of weight!

Product introduction

# Easy and Quick to Set up the Cube

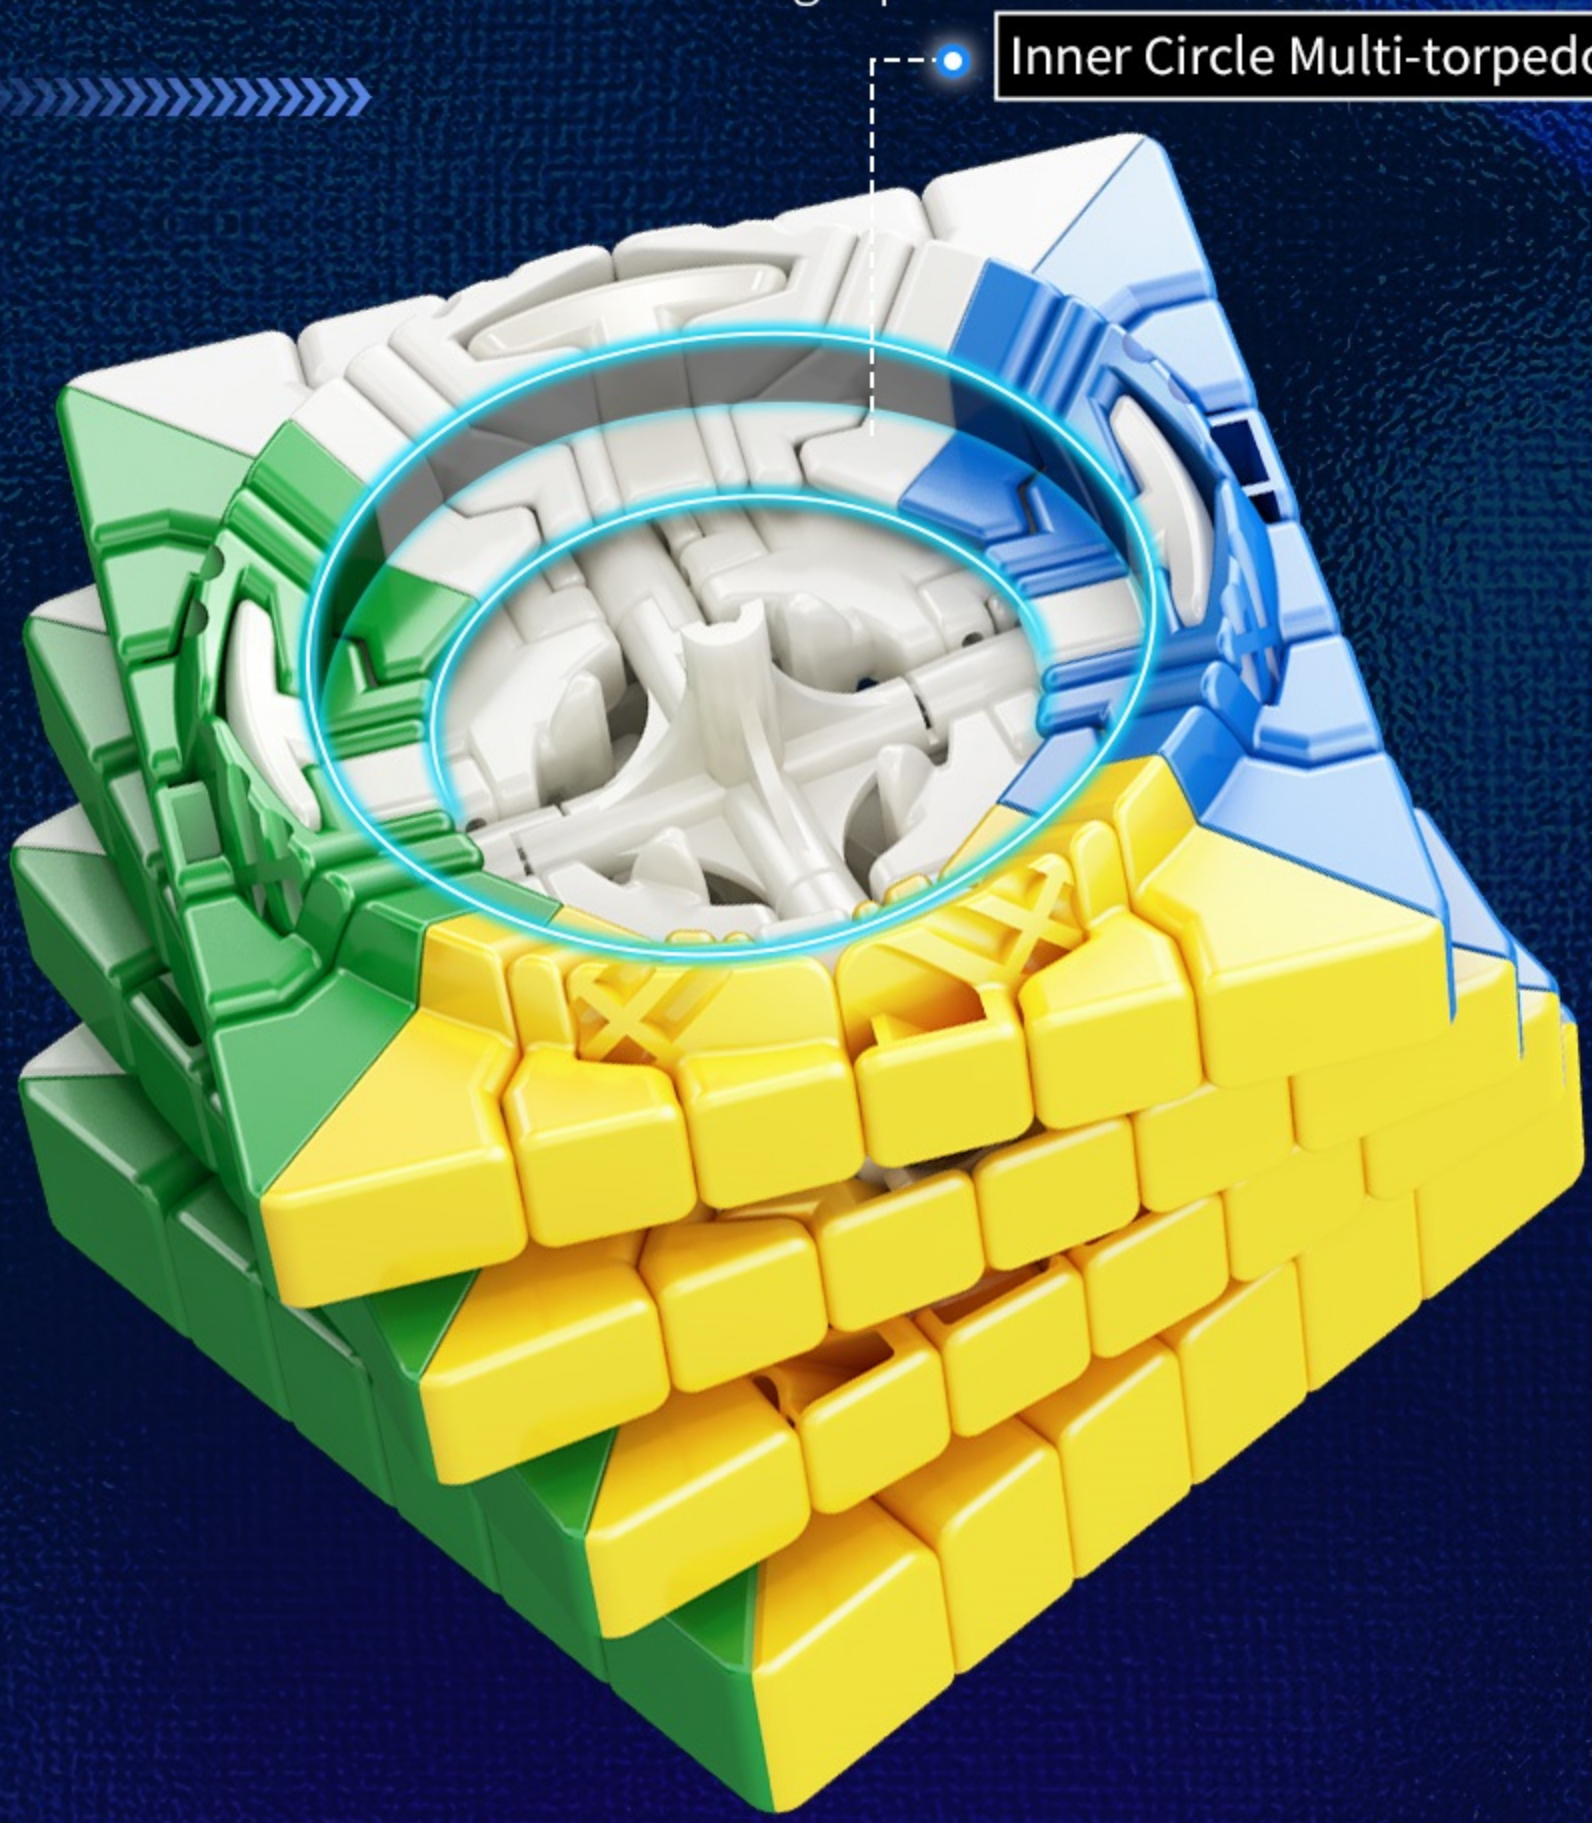

By adjust the tension, you will get a feel that fits you.

Product introduction

# Multiple Torpedo Design

Brand new multi-torpedo design, the edges and corners are fit to be a circle.
Makes the cube more stable while in high speed.

Product introduction

# Lube Storage Design

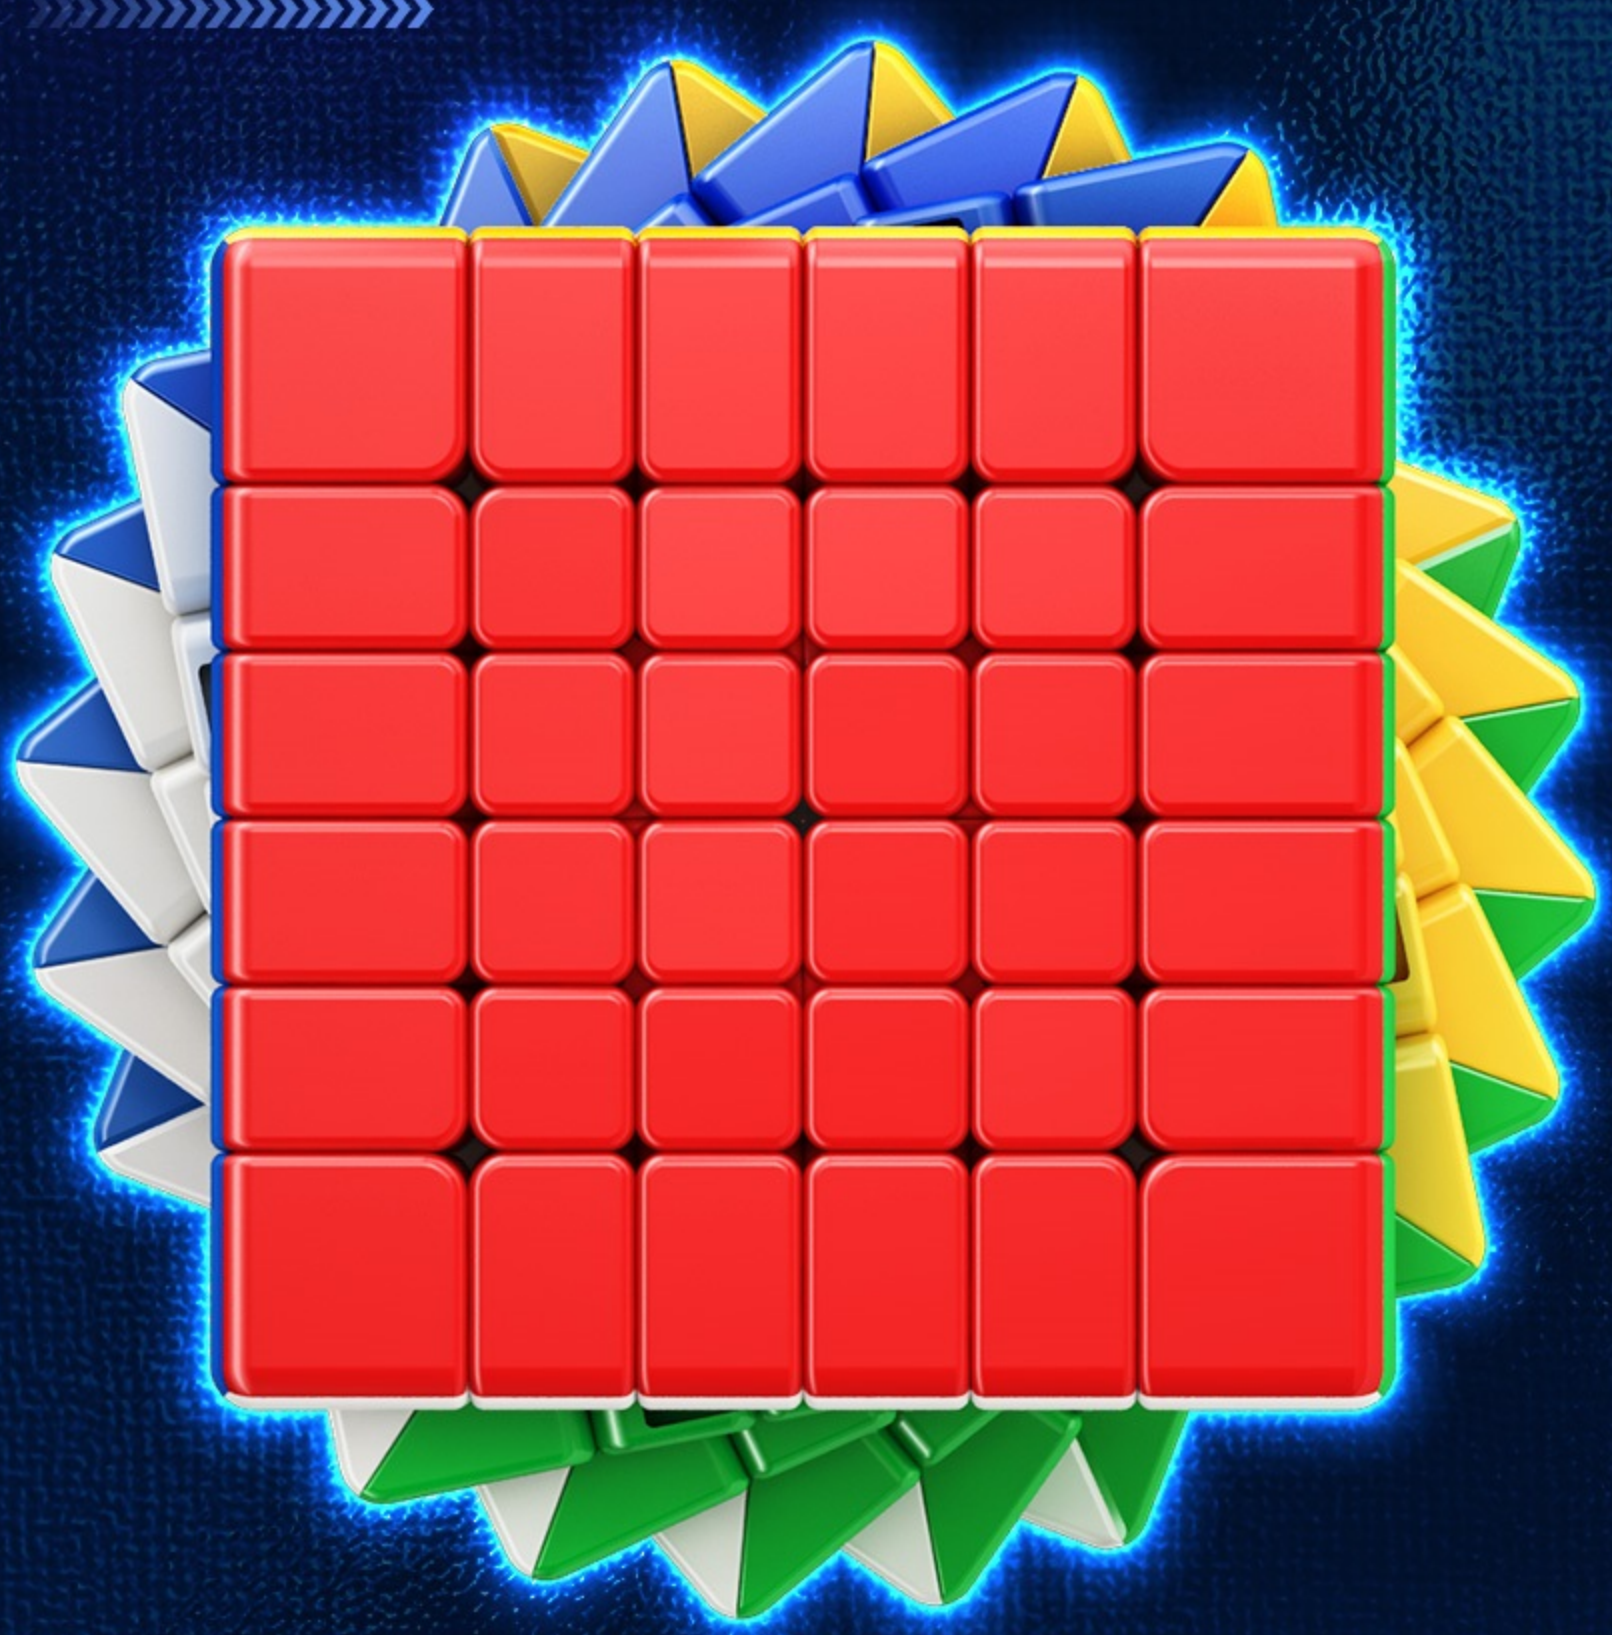

There are multiple holes on pieces, use lube on them and the lube will work gradually, making the smooth feelings last longer.

Product introduction

# Brand New Color Scheme

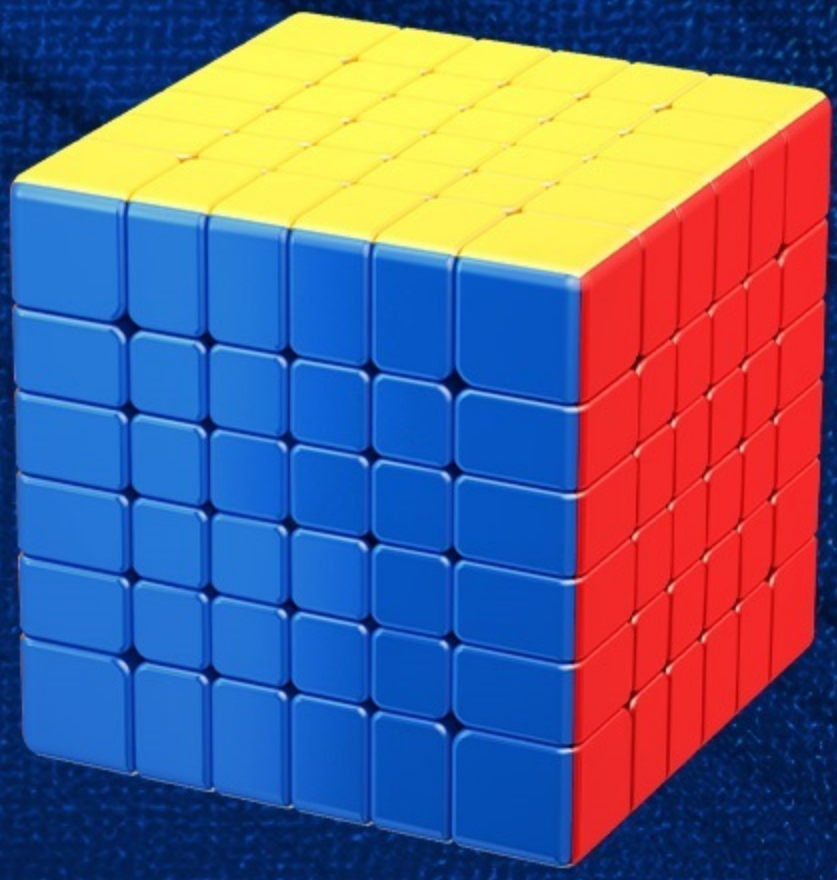

A new color scheme, makes you faster to see in high speed.
