奇艺
QY TOYS

FULLY MAGNETICALLY DRIVEN FOR ULTIMATE SPEED AND PRECISION.

[QY Magnetic 9x9x9 Cube]

9M

SPEEDCUBING WITH AN EXCEPTIONAL GRIP FOR ULTIMATE CONTROL COMPACT AND LIGHTWEIGHT, PERFECTLY FITTING IN YOUR HAND FOR EASY CONTROL.

214g lightweight

Reduces strain during solving

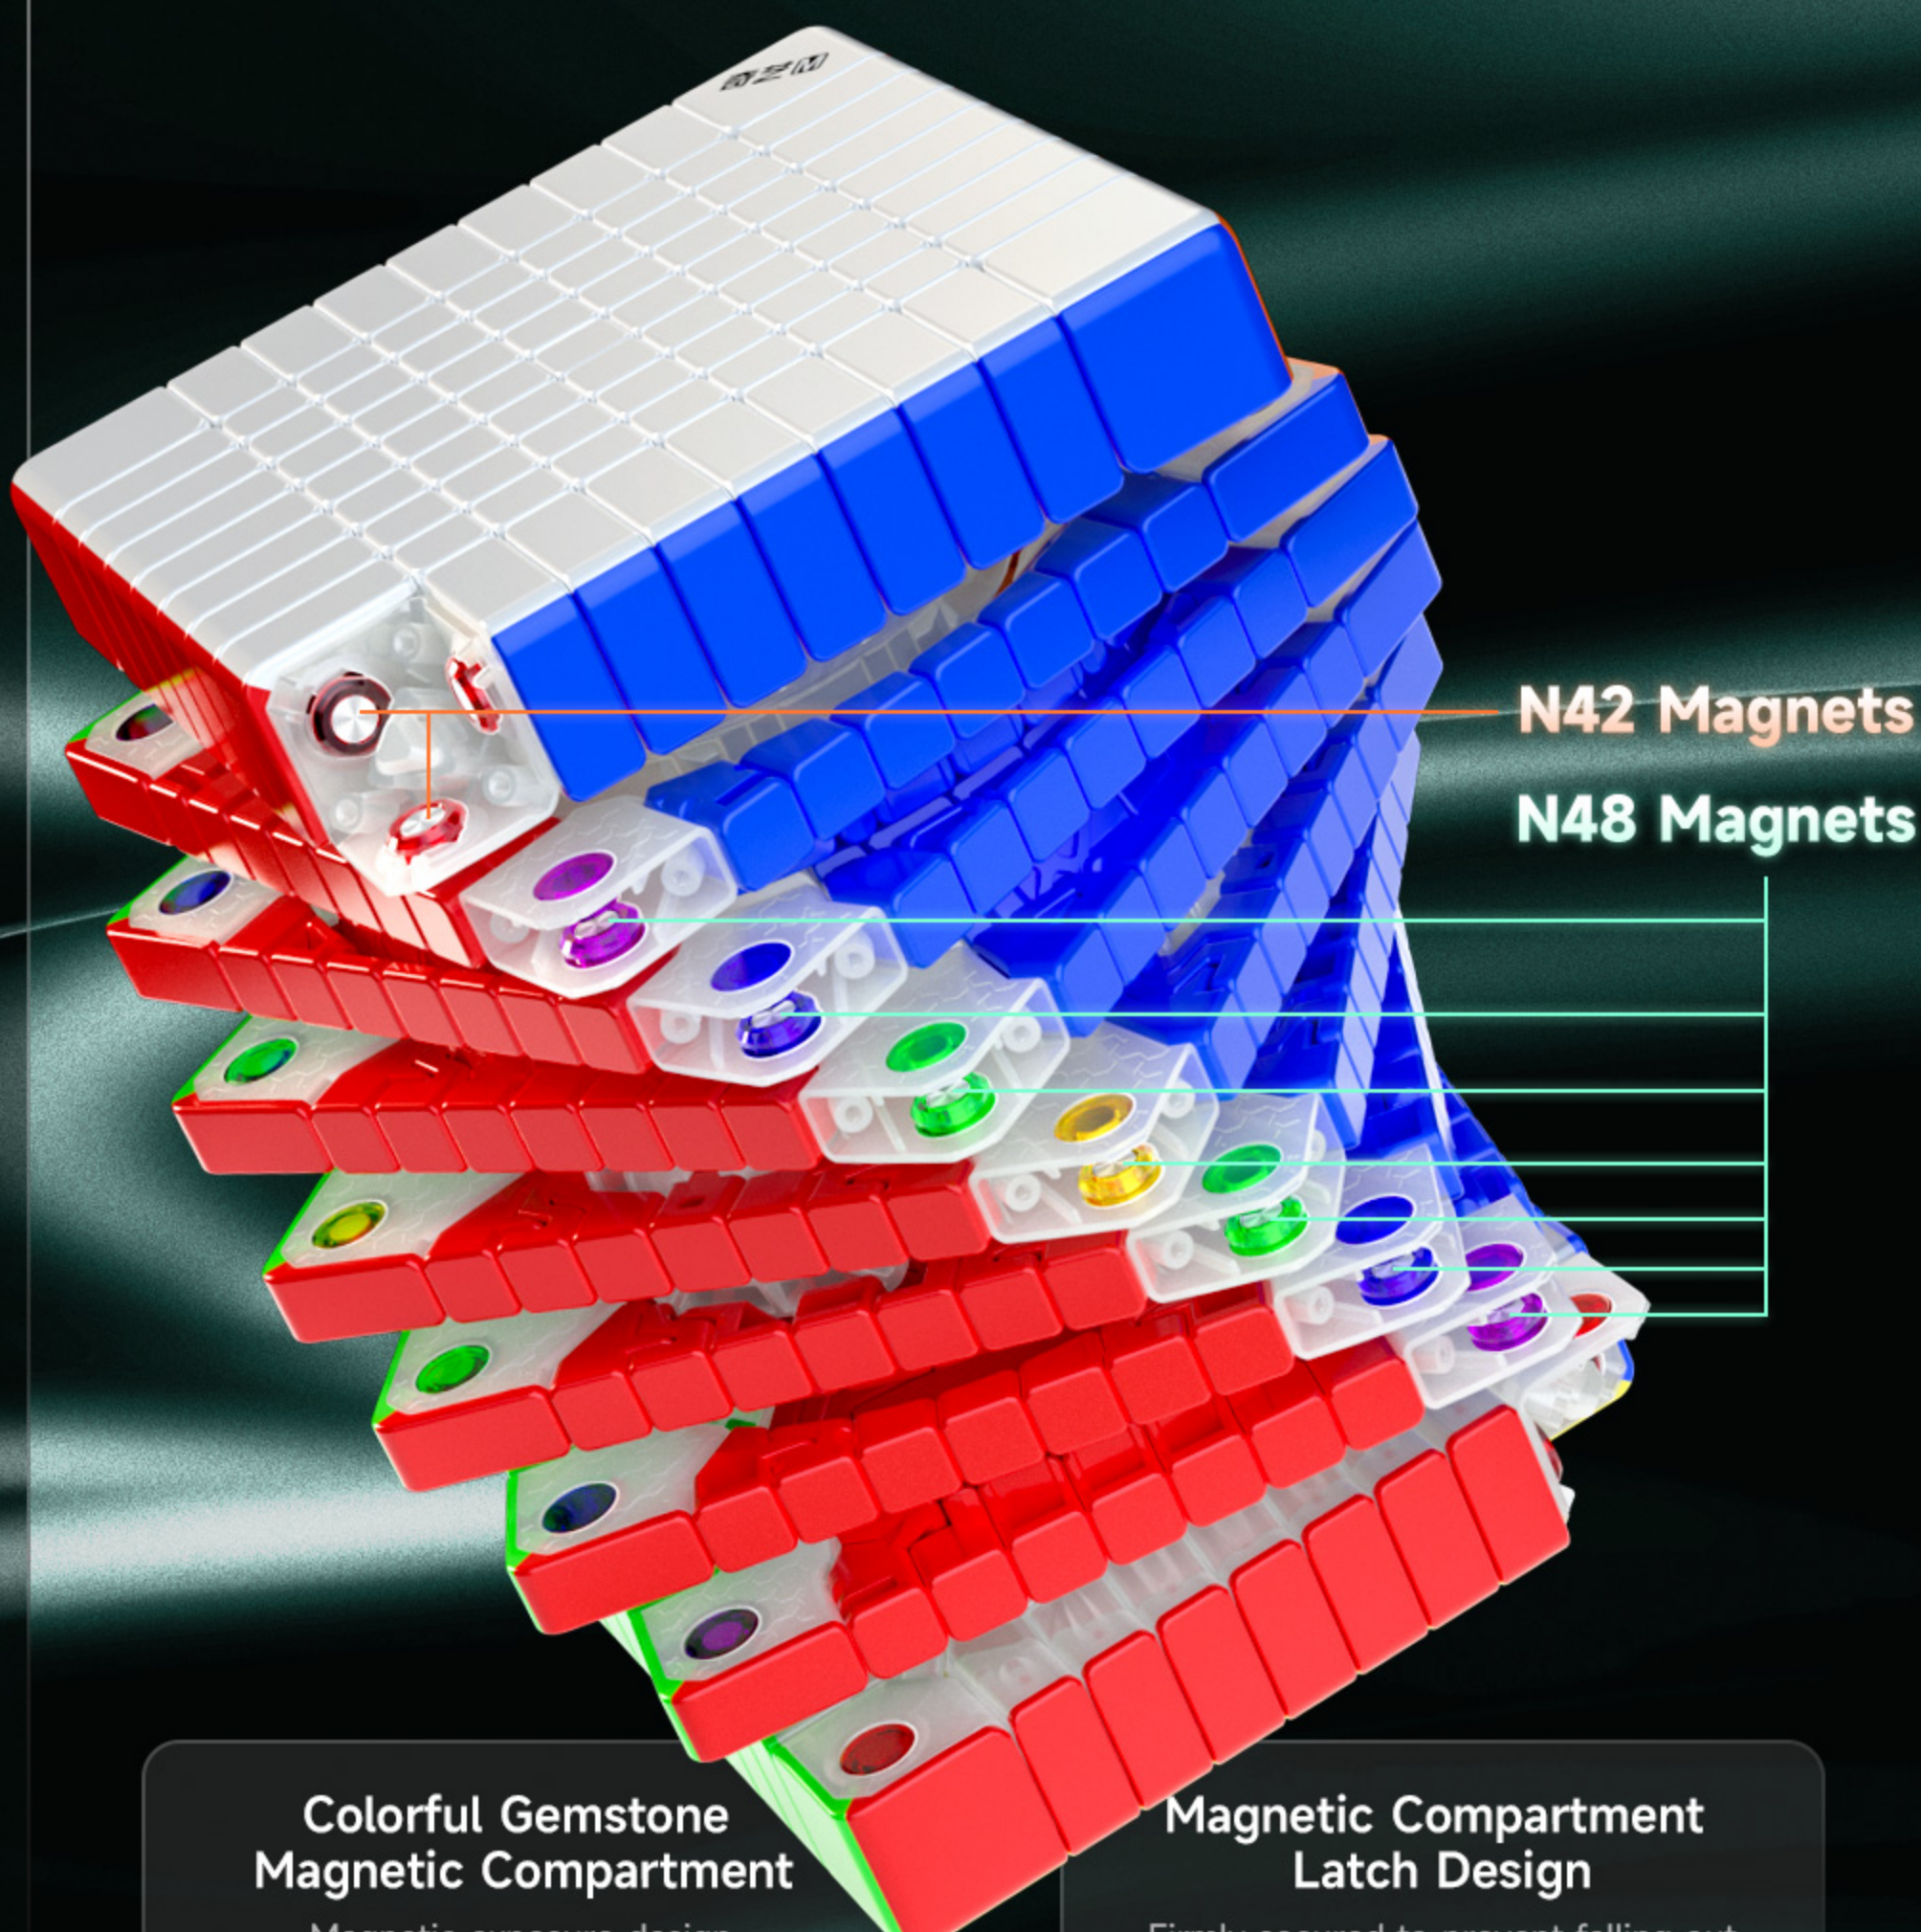

68mm compact size

A breakthrough in the 9x9x9 cube

MAGNETIC POSITIONING DESIGN DUAL POSITIONING SYSTEM ENSURES PRECISE ALIGNMENT AND STABLE PERFORMANCE

EDGE-CORNER MAGNETIC POSITIONING: THE SCIENTIFICALLY OPTIMIZED MAGNETIC LAYOUT FEATURES SMALLER MAGNETS ON THE OUTER LAYERS AND LARGER MAGNETS ON THE INNER LAYERS.

Ensuring that when rotating the outer layer during cube restoration,
the inner layer remains stable and undisturbed,
enabling smoother and faster performance.

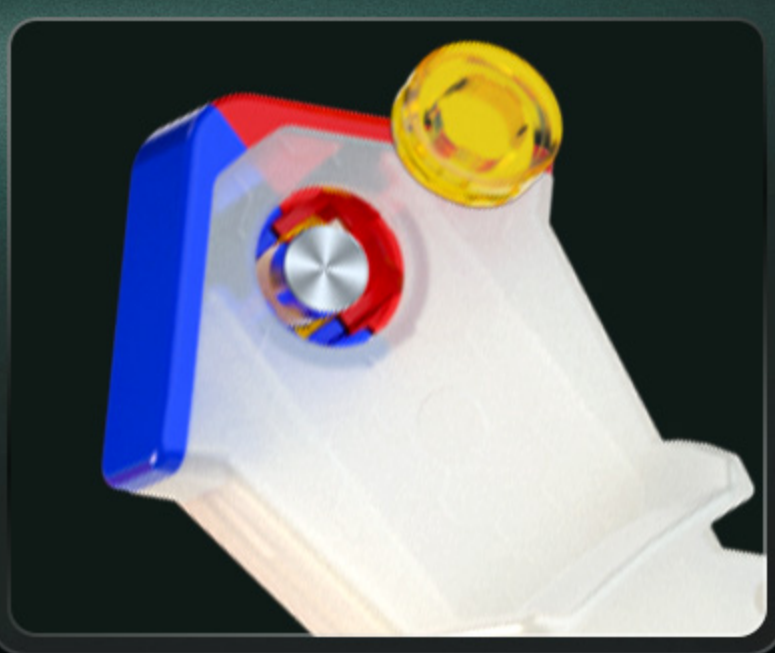

Colorful Gemstone Magnetic Compartment

Magnetic exposure design,
visually appealing and eye-catching

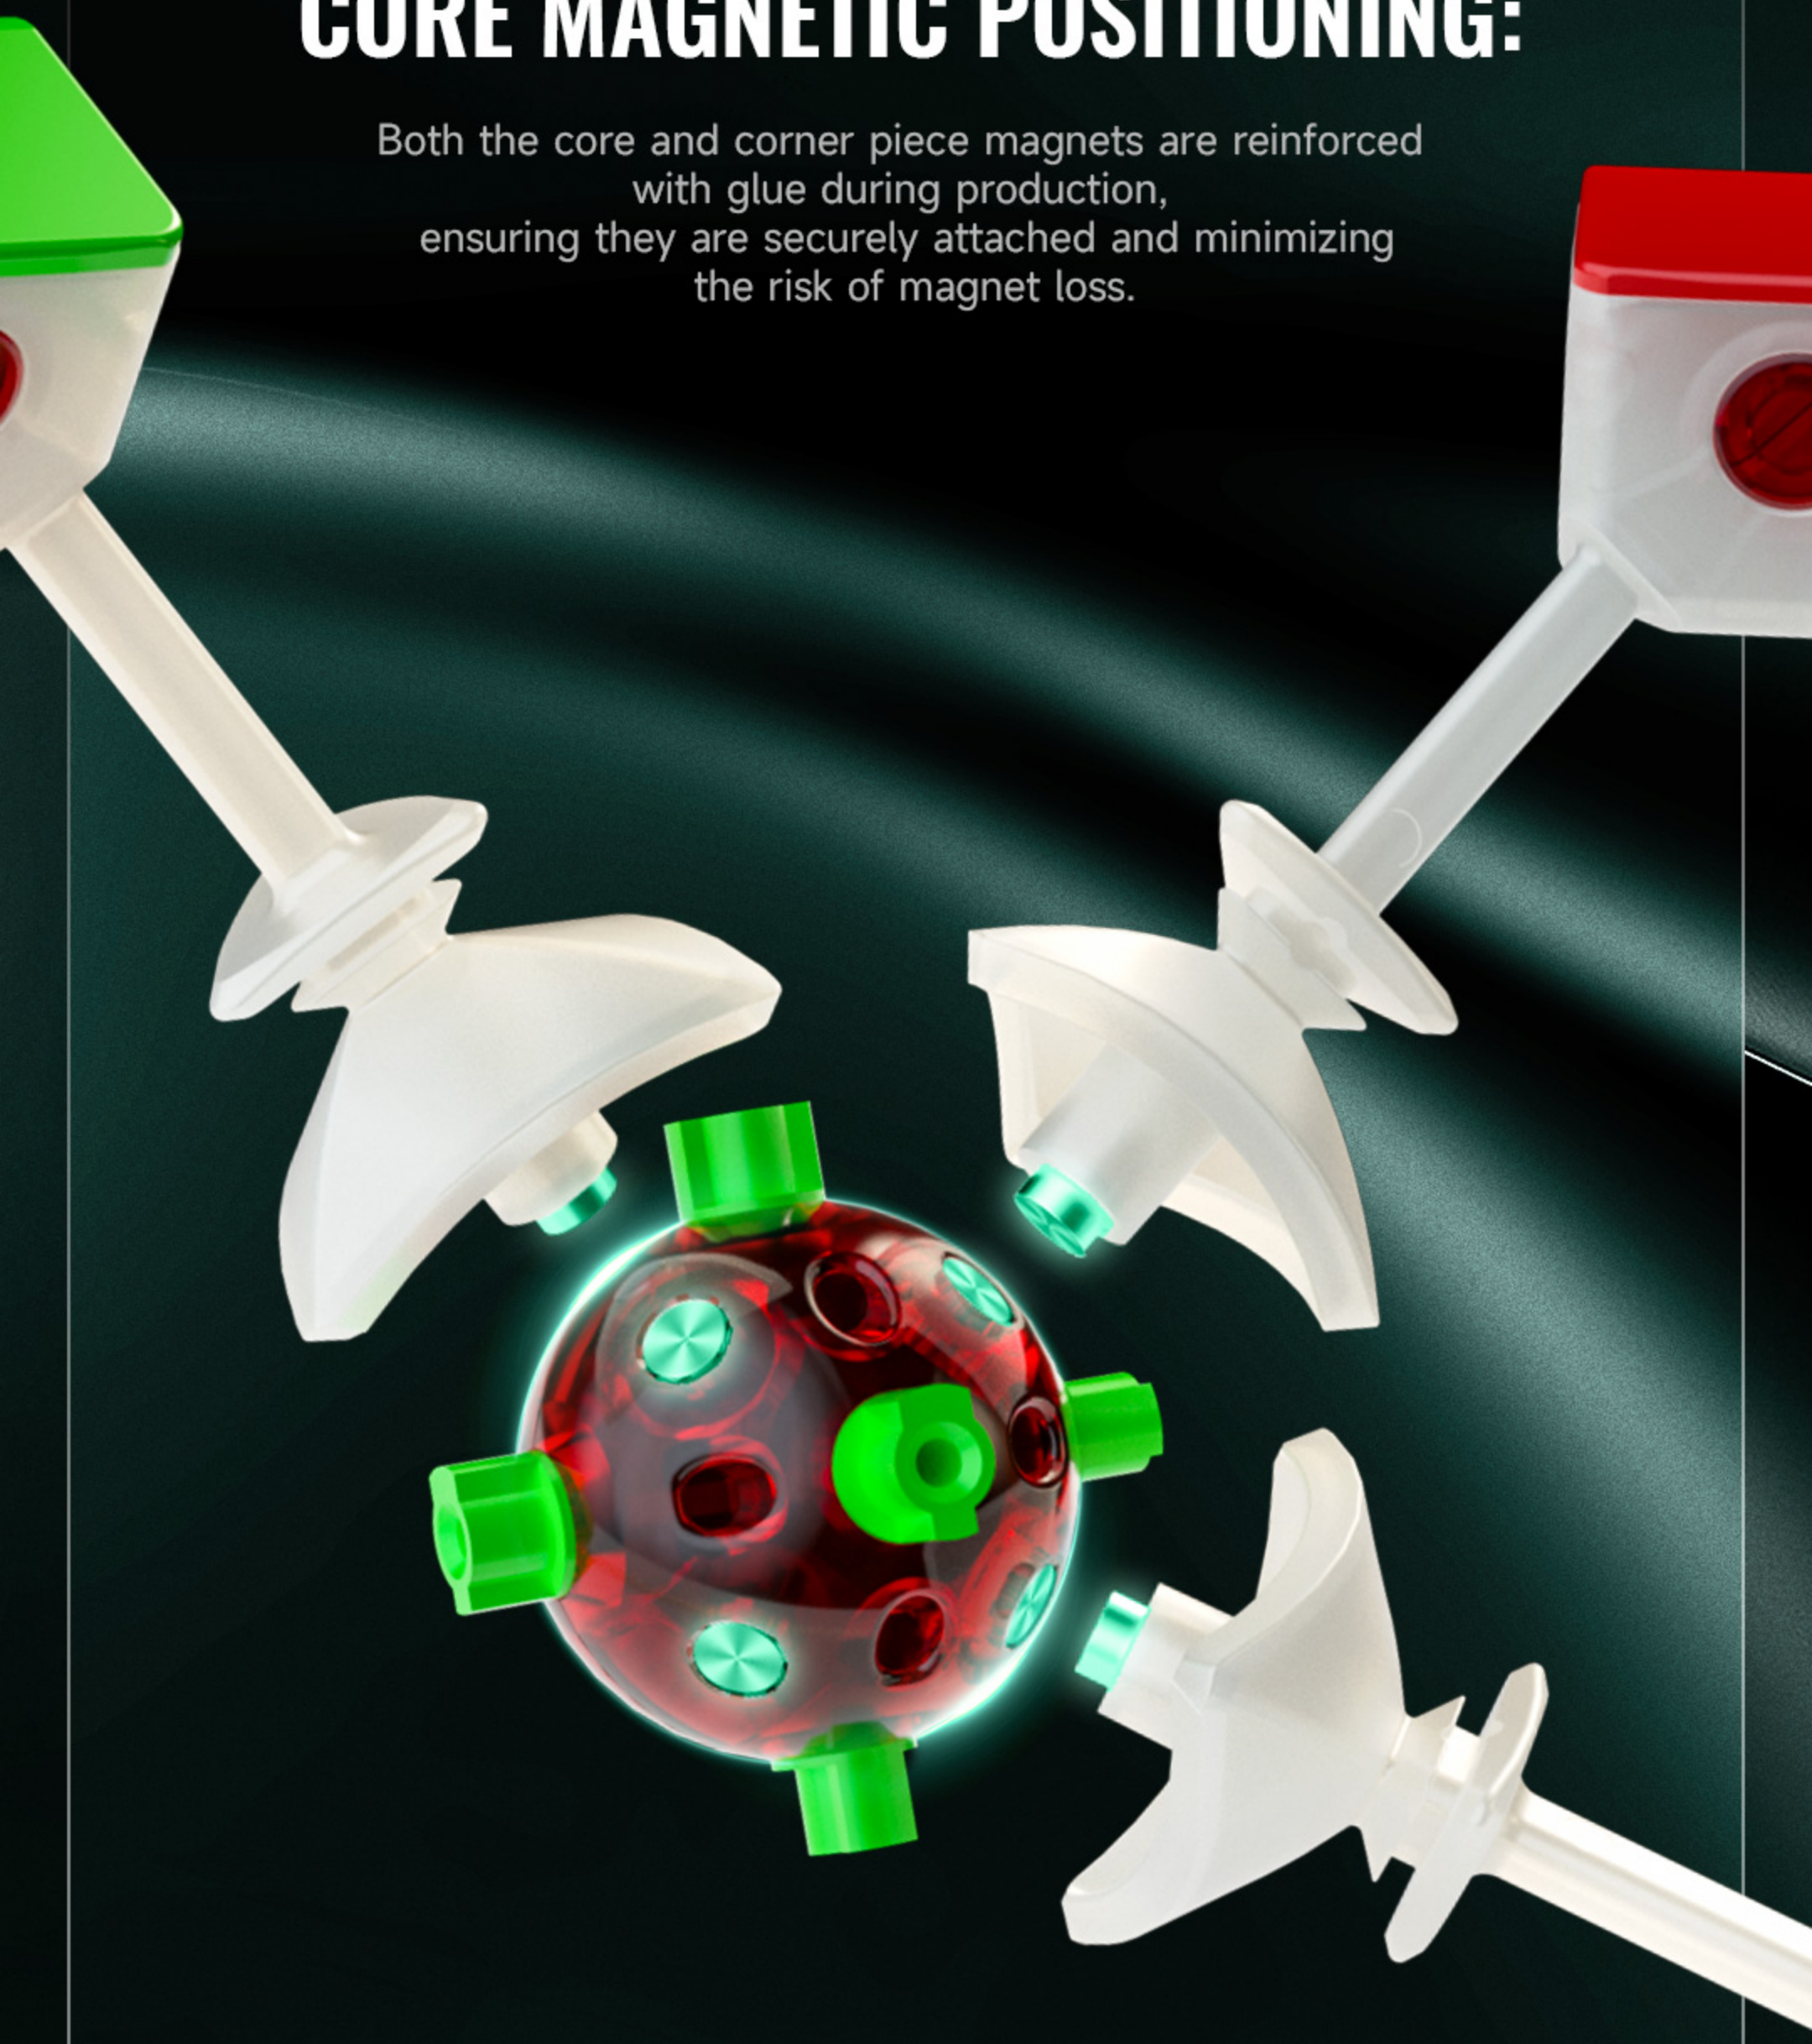

Magnetic Compartment Latch Design

Firmly secured to prevent falling out

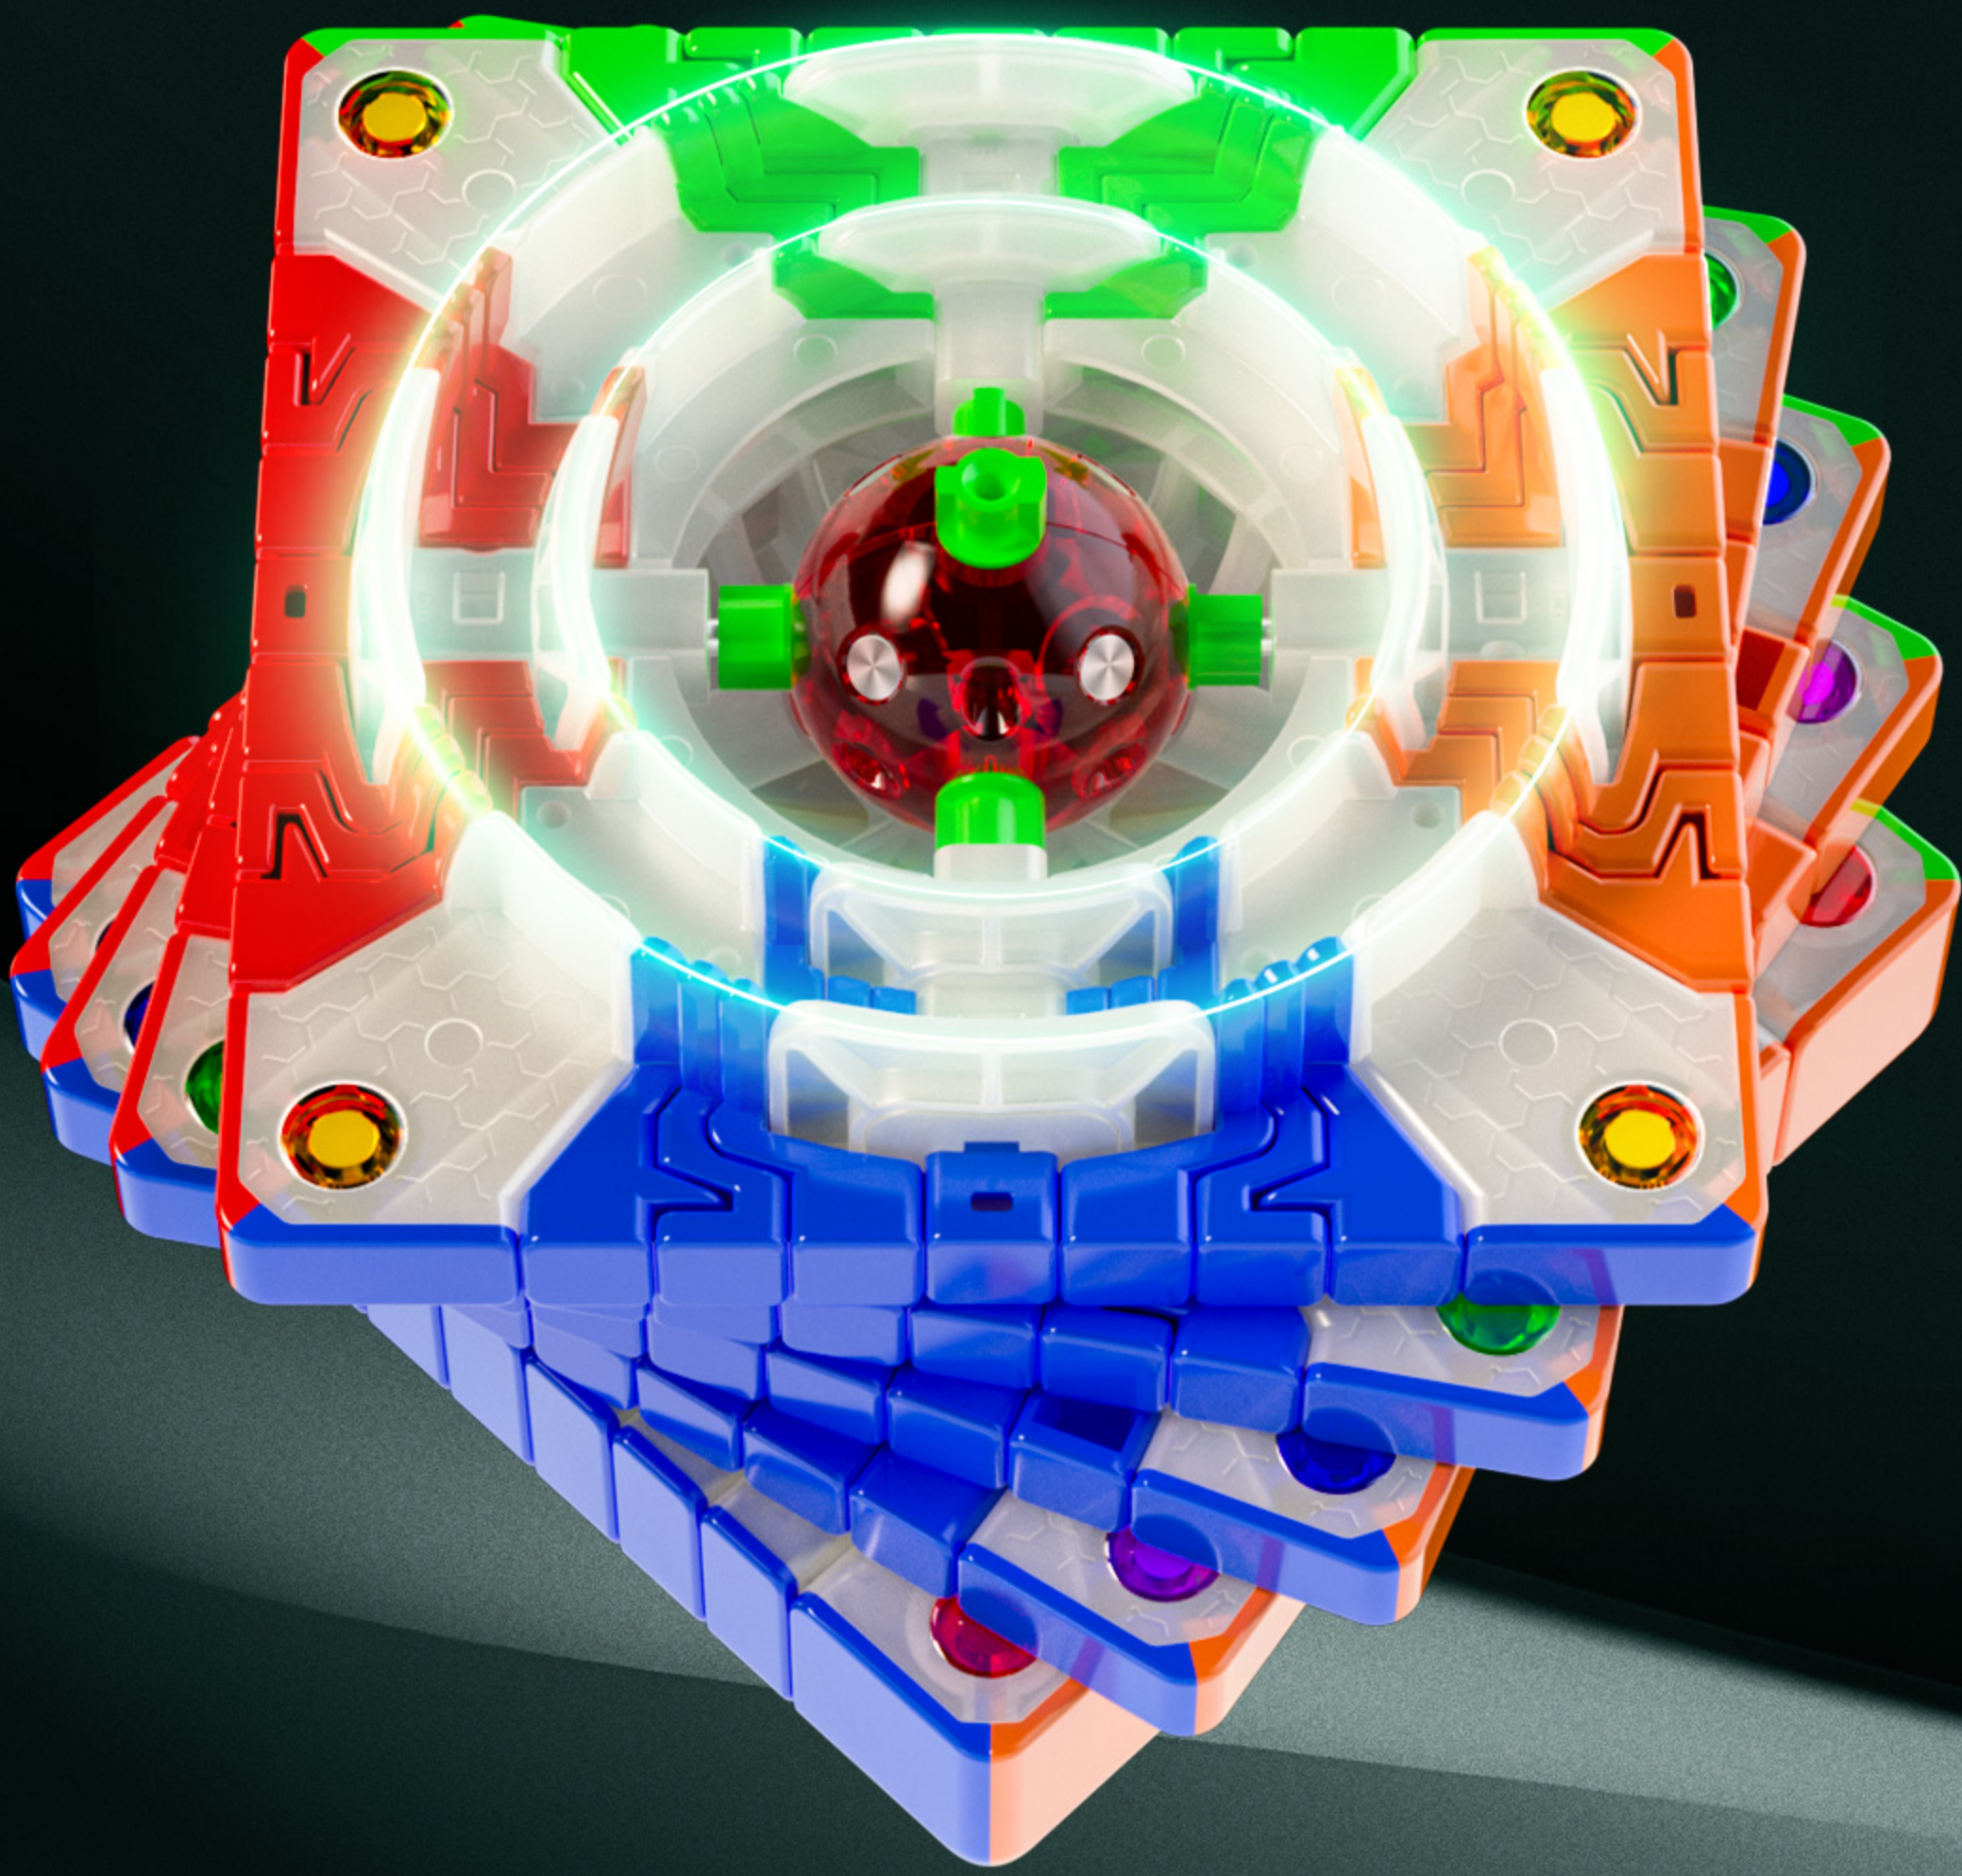

CORE MAGNETIC POSITIONING:

Both the core and corner piece magnets are reinforced
with glue during production,
ensuring they are securely attached and minimizing
the risk of magnet loss.

STREAMLINED DESIGN FOR IMPROVED TURNING PERFORMANCE
THE DUAL-CENTER DESIGN GUARANTEES A SMOOTH AND SATISFYING EXPERIENCE

QY Magnetic 9x9x9 Cube

	Dual-Center Structure	Common 9x9x9 Cubes on the Market Triple-Center Structure
Features	**Fewer mating surfaces make it easier to correct mold errors.**	More mating surfaces make repairing mold errors more challenging.
Turning	**Experience a smoother and more stable flat feel.**	More susceptible to rotational vibrations.

A TRUE POWERHOUSE IN SPEED CUBING, THIS CUBE ALSO EXCELS IN AESTHETICS.

9M

Bright Color Scheme Patchwork: Enhanced color distinction for optimal look-a-head during solves.

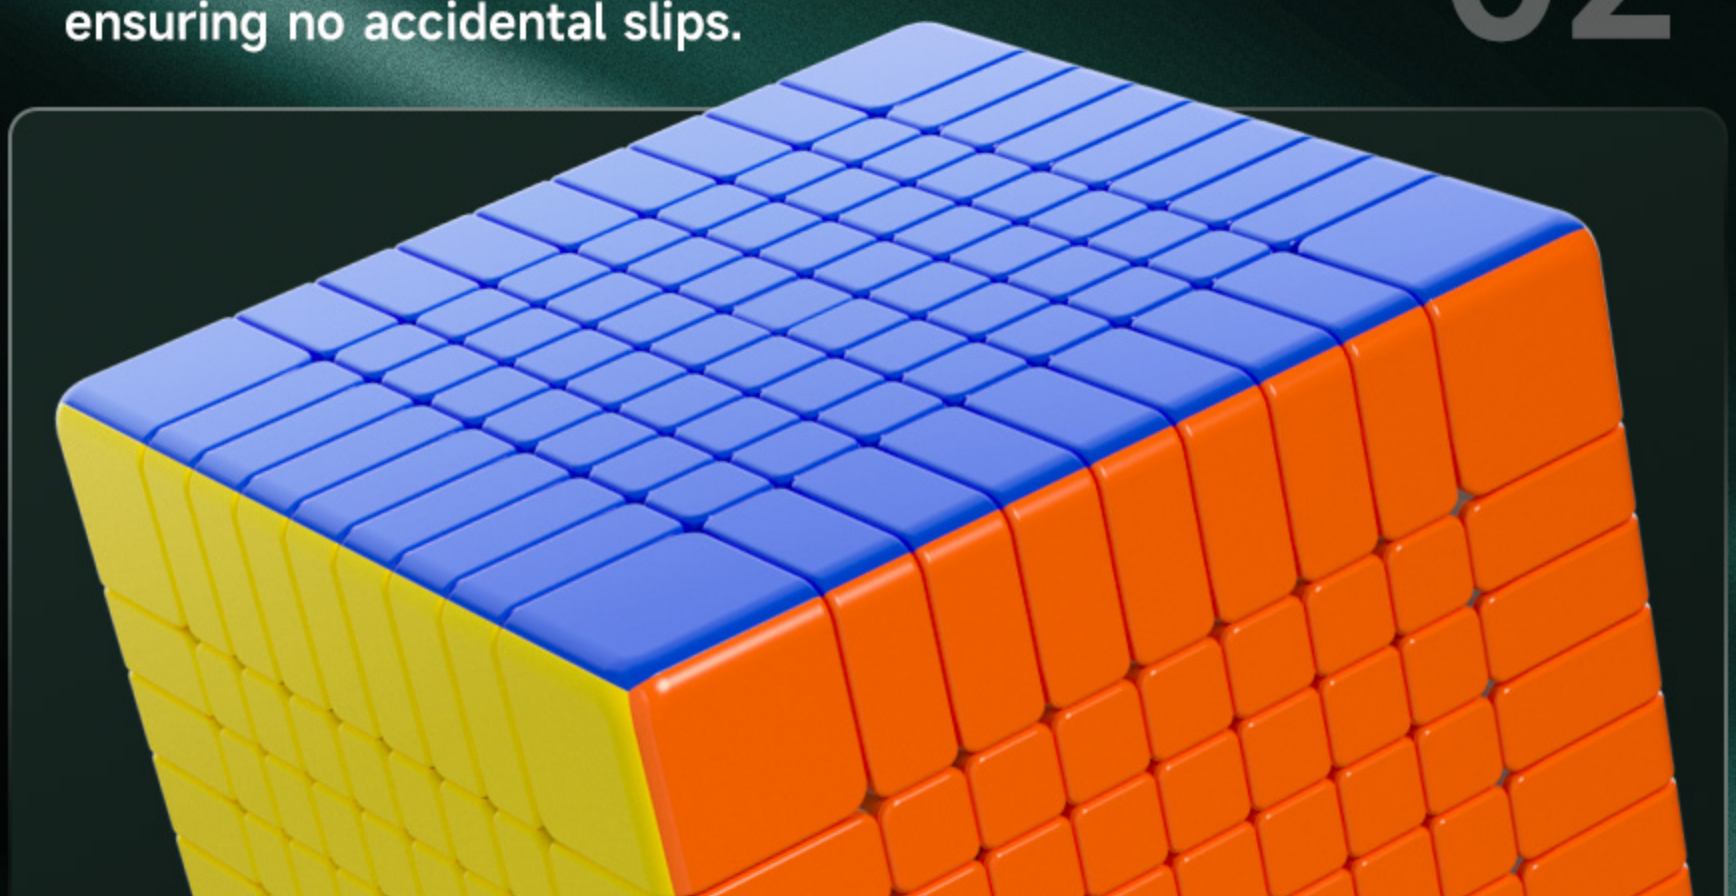

Patch clip design ensures secure attachment, keeping pieces firmly in place.

01

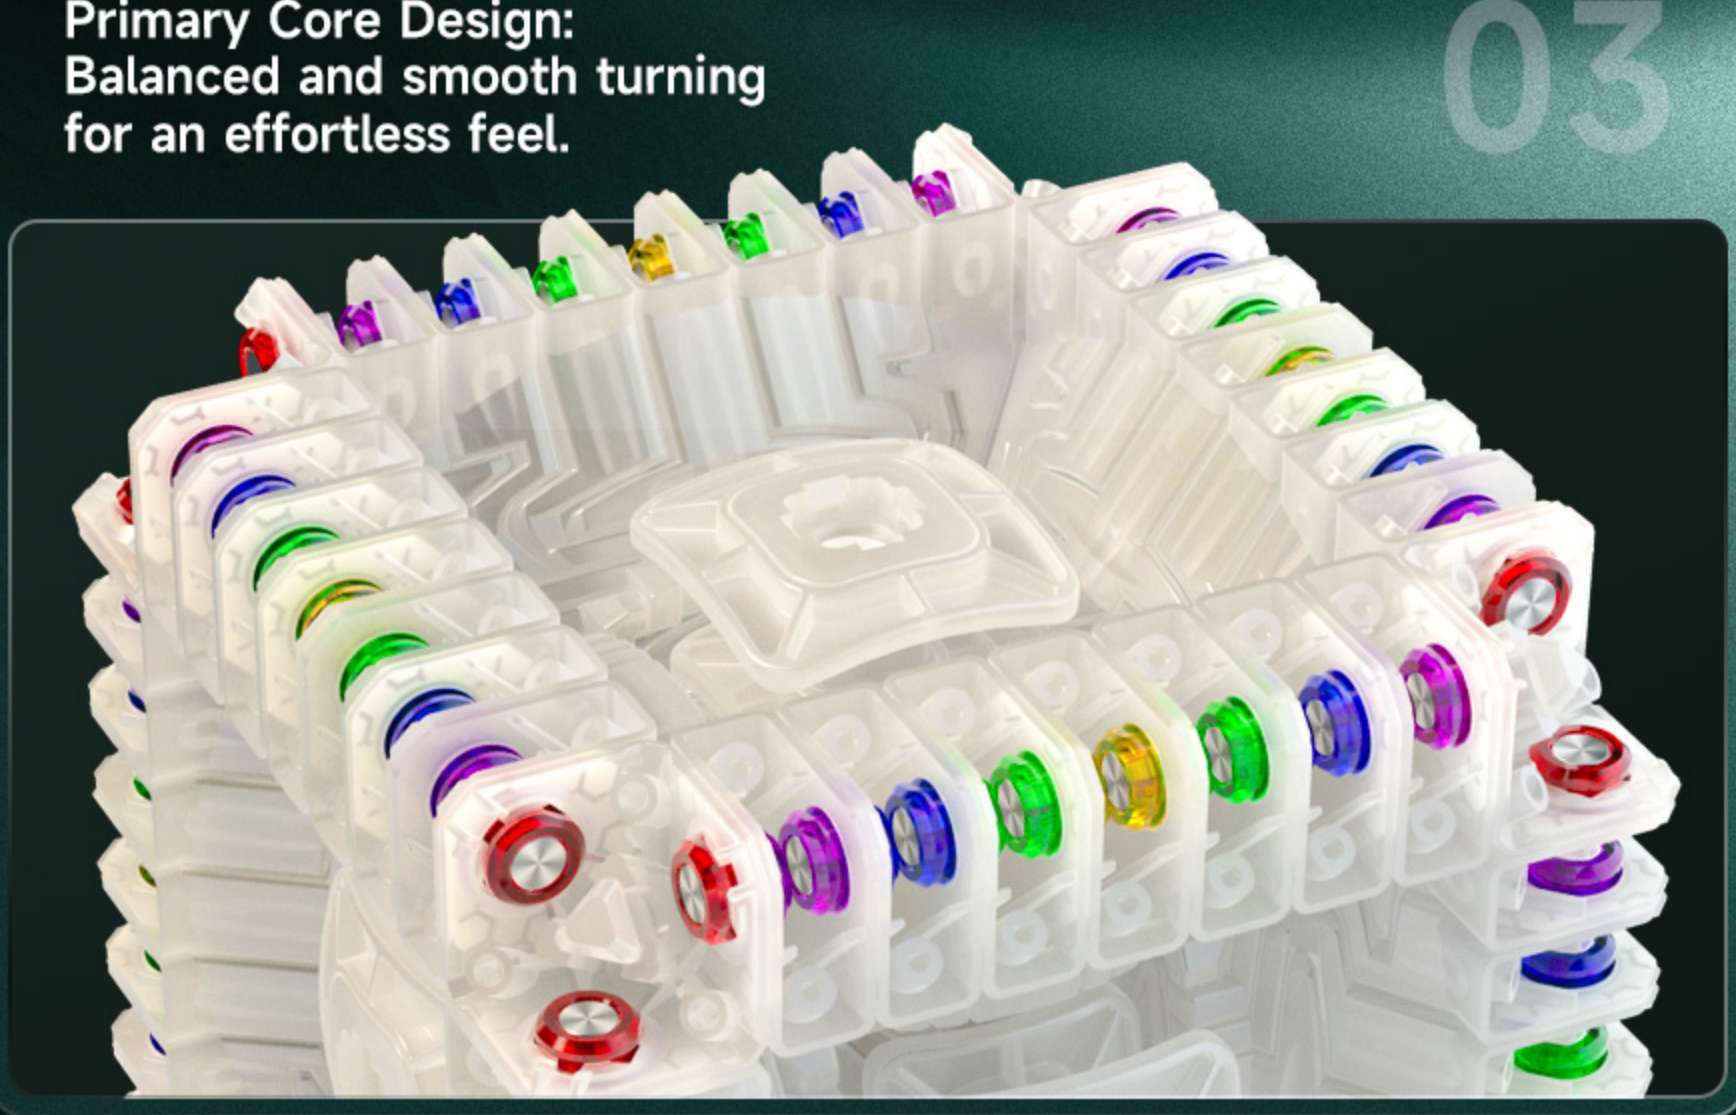

Half-bright Gloss Surface: Exceptional grip for speed cubing, ensuring no accidental slips.

02

Primary Core Design: Balanced and smooth turning for an effortless feel.

03

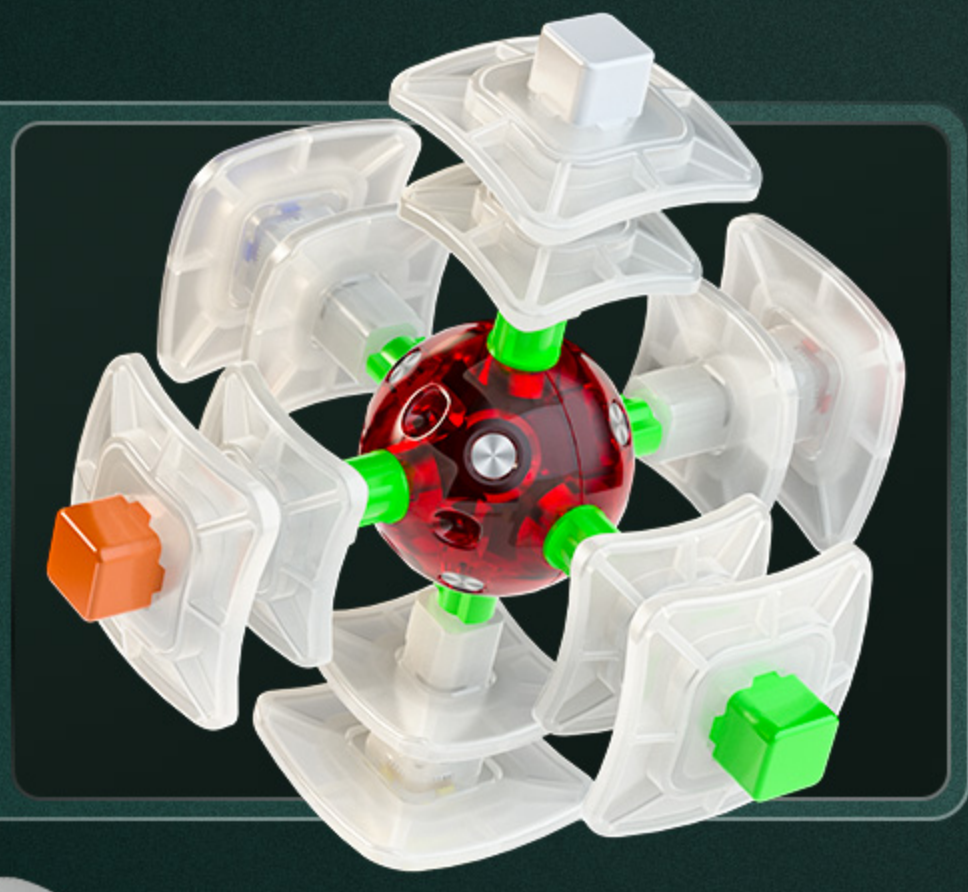

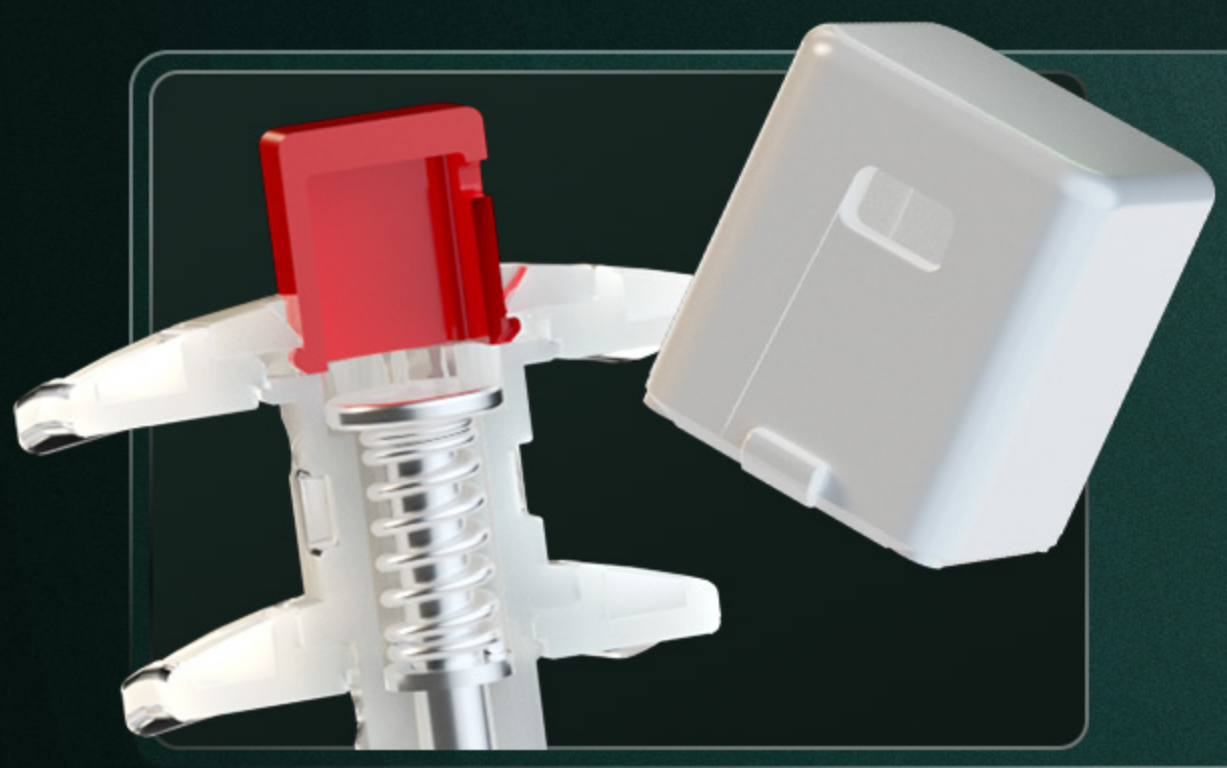

A GRATIFYING EXPERIENCE STEMS FROM CAREFUL ATTENTION TO EVERY DETAIL.

9M

Integrated Center Column + Clip Assembly Design

The integrated center column eliminates wobbling: The dual center pieces are firmly attached to the center column, ensuring a more stable and cohesive structure.

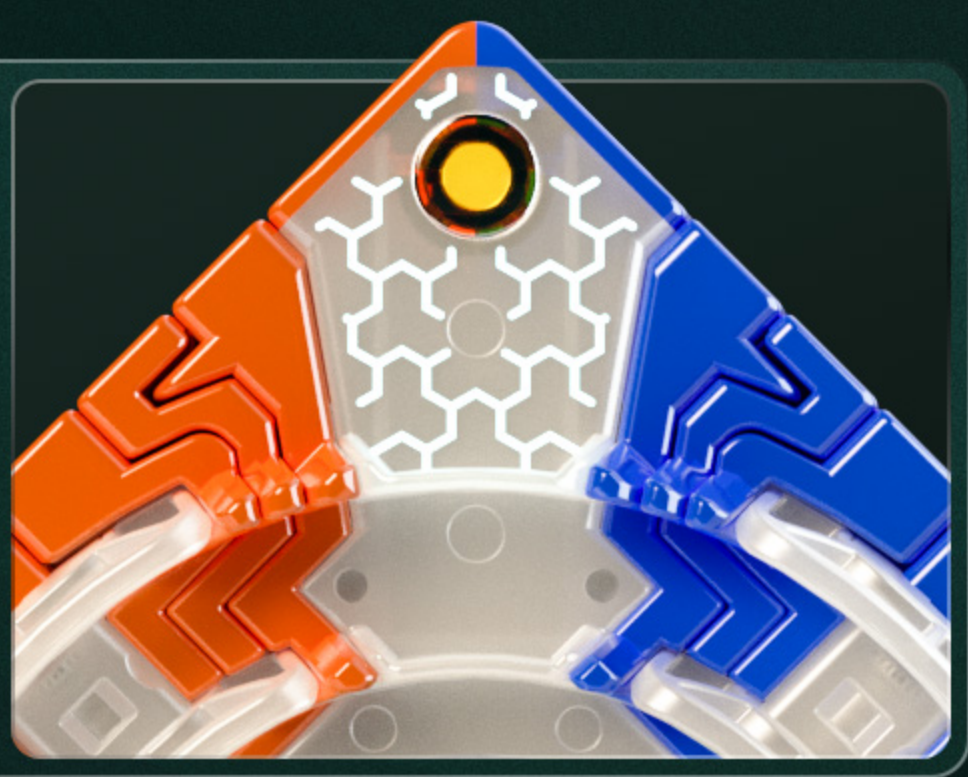

Center Cap Clip Design

Say goodbye to cap drops!

PS: Can be pried open with a small flathead screwdriver.

Rocket Anti-Stick Groove Design

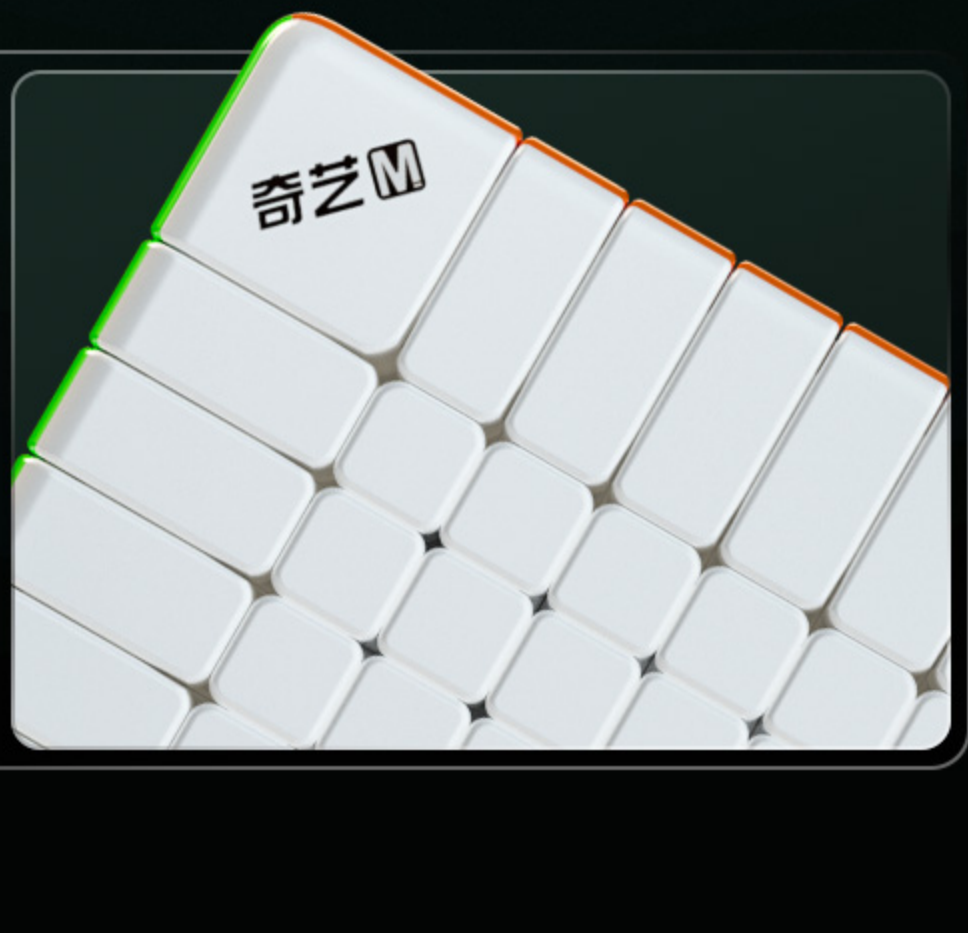

Enjoy a smooth and non-sticky turning experience.

Integrated Edge Contact Surface Design

Minimizes misalignment and assembly errors for a consistently smooth turning experience.

Outer Layer Widening Design

Designed for the unique solving traits of higher-level cubes, enabling effortless and precise turning.

INCLUDES COMPREHENSIVE SOLVING INSTRUCTIONS
