TORNADO V5

Multi-dimensional Refinement for Players Far Beyond a Simple Iteration

- PS: Maximum score per category is 5. -

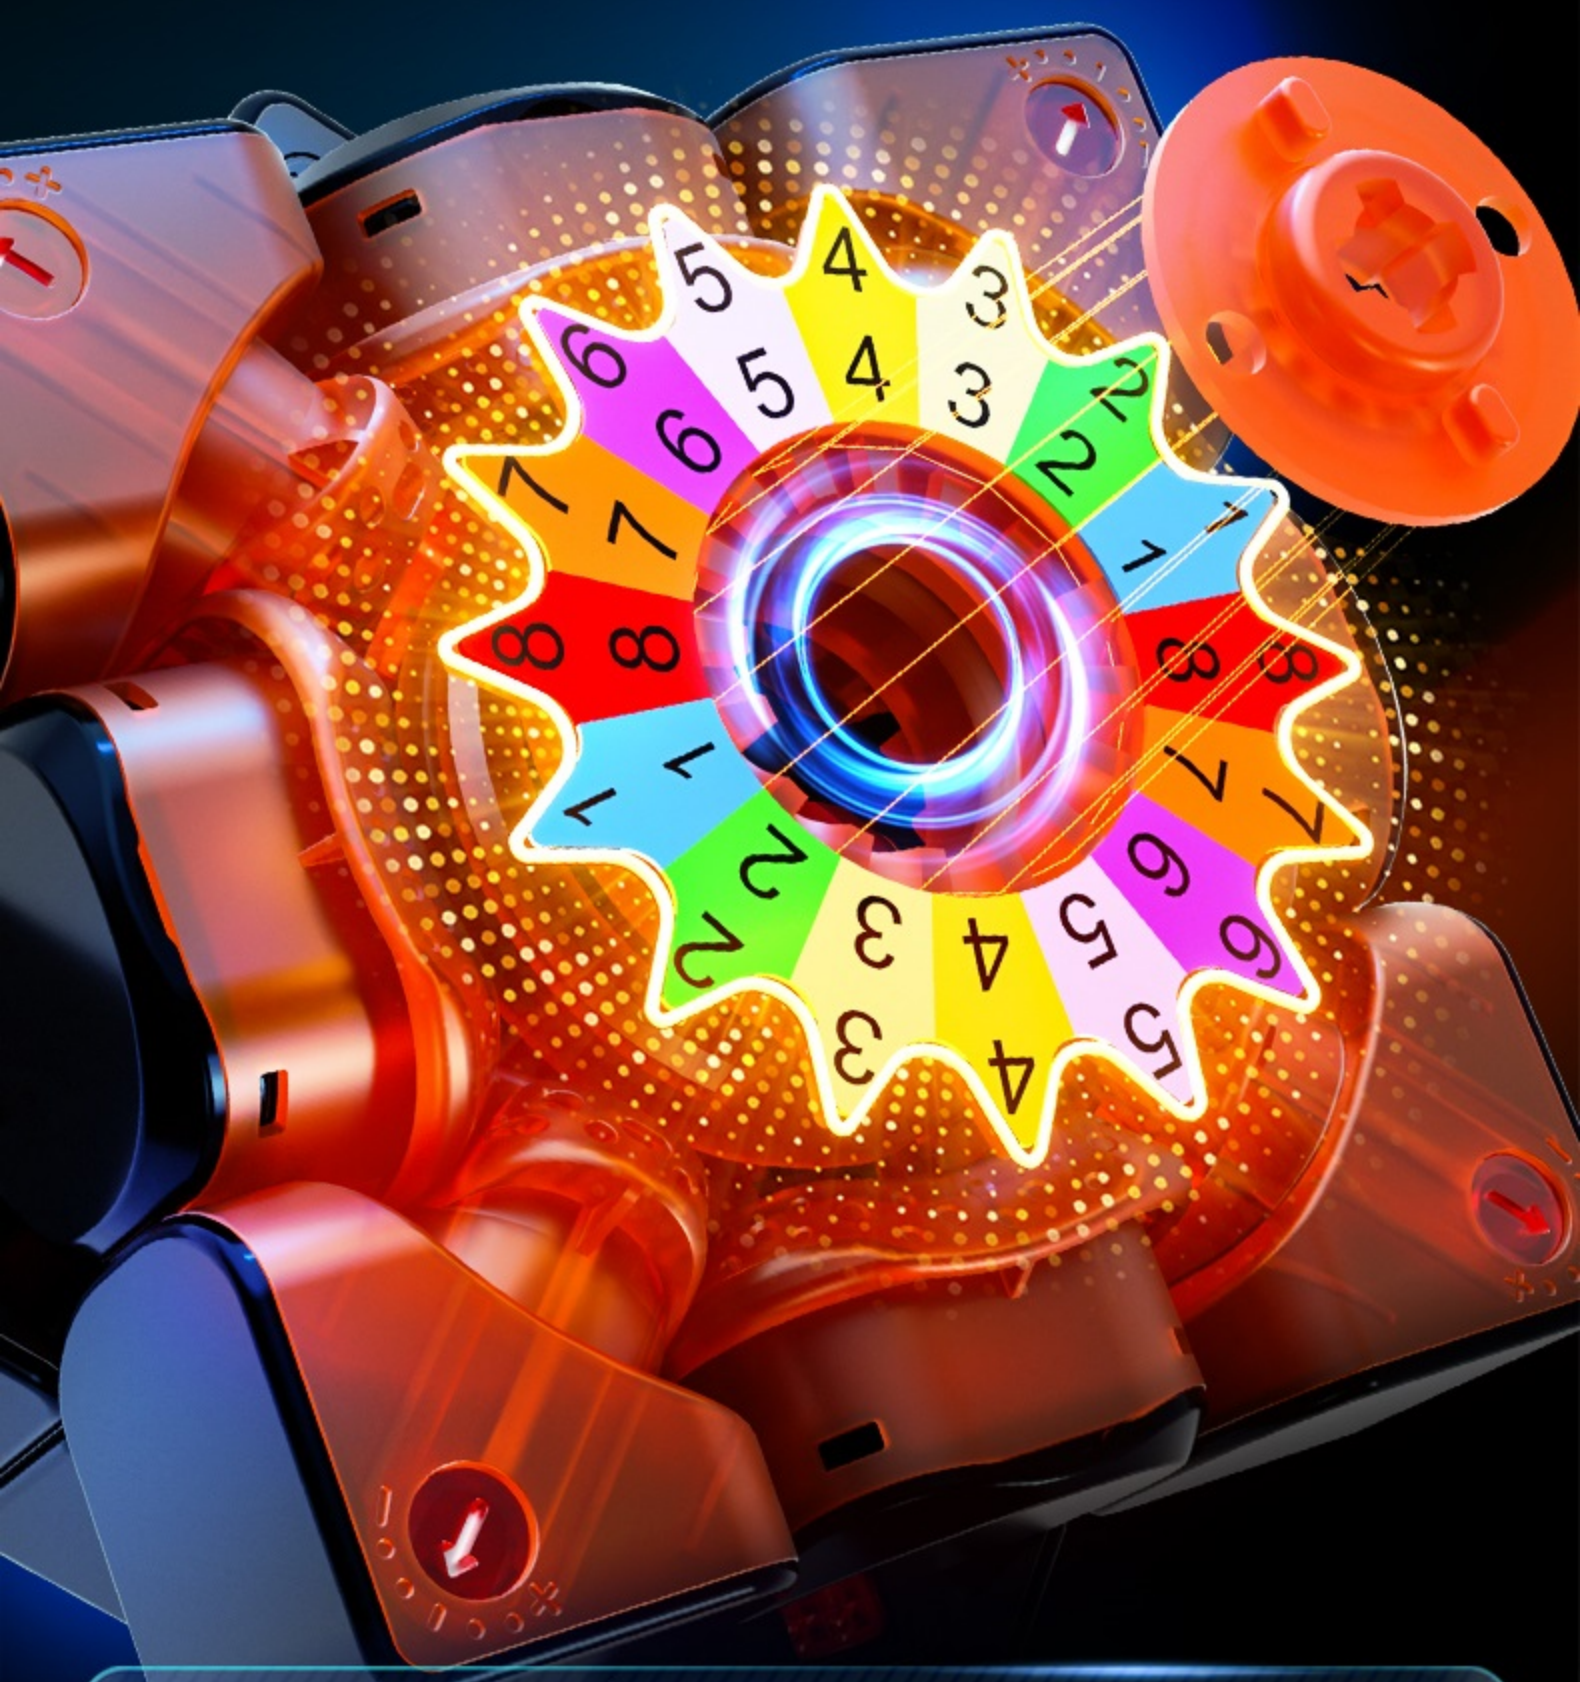

Tornado V5 Tornado V4

TORNADO V5

Tune in seconds, Feel You Can Measure

Visual Multi-Star Dual Adjustment System
8 levels of axis distance and elasticity, fine-tune your cube effortlessly by hand

Industrial-grade color digital display:
your preferred feel now has a clear scale

8 Axis Distance Settings

Rotate Counterclockwise
Higher Number
Tighter Axis Distance

8 Elasticity Settings

Rotate Clockwise
Higher Number
Stronger Elasticity

TORNADO V5

A Soft, Lightweight Feel That Redefines Expectations

Adjustable Maglev System
Two nested magnetic rings – large and small – work together in a compact design

Free up space for lightweight, explosive speed

Maglev System Principle

Elasticity is adjusted by changing the distance between the large and small magnetic rings, which alters the magnetic repulsion force.

【8-gear adjustment illustration】

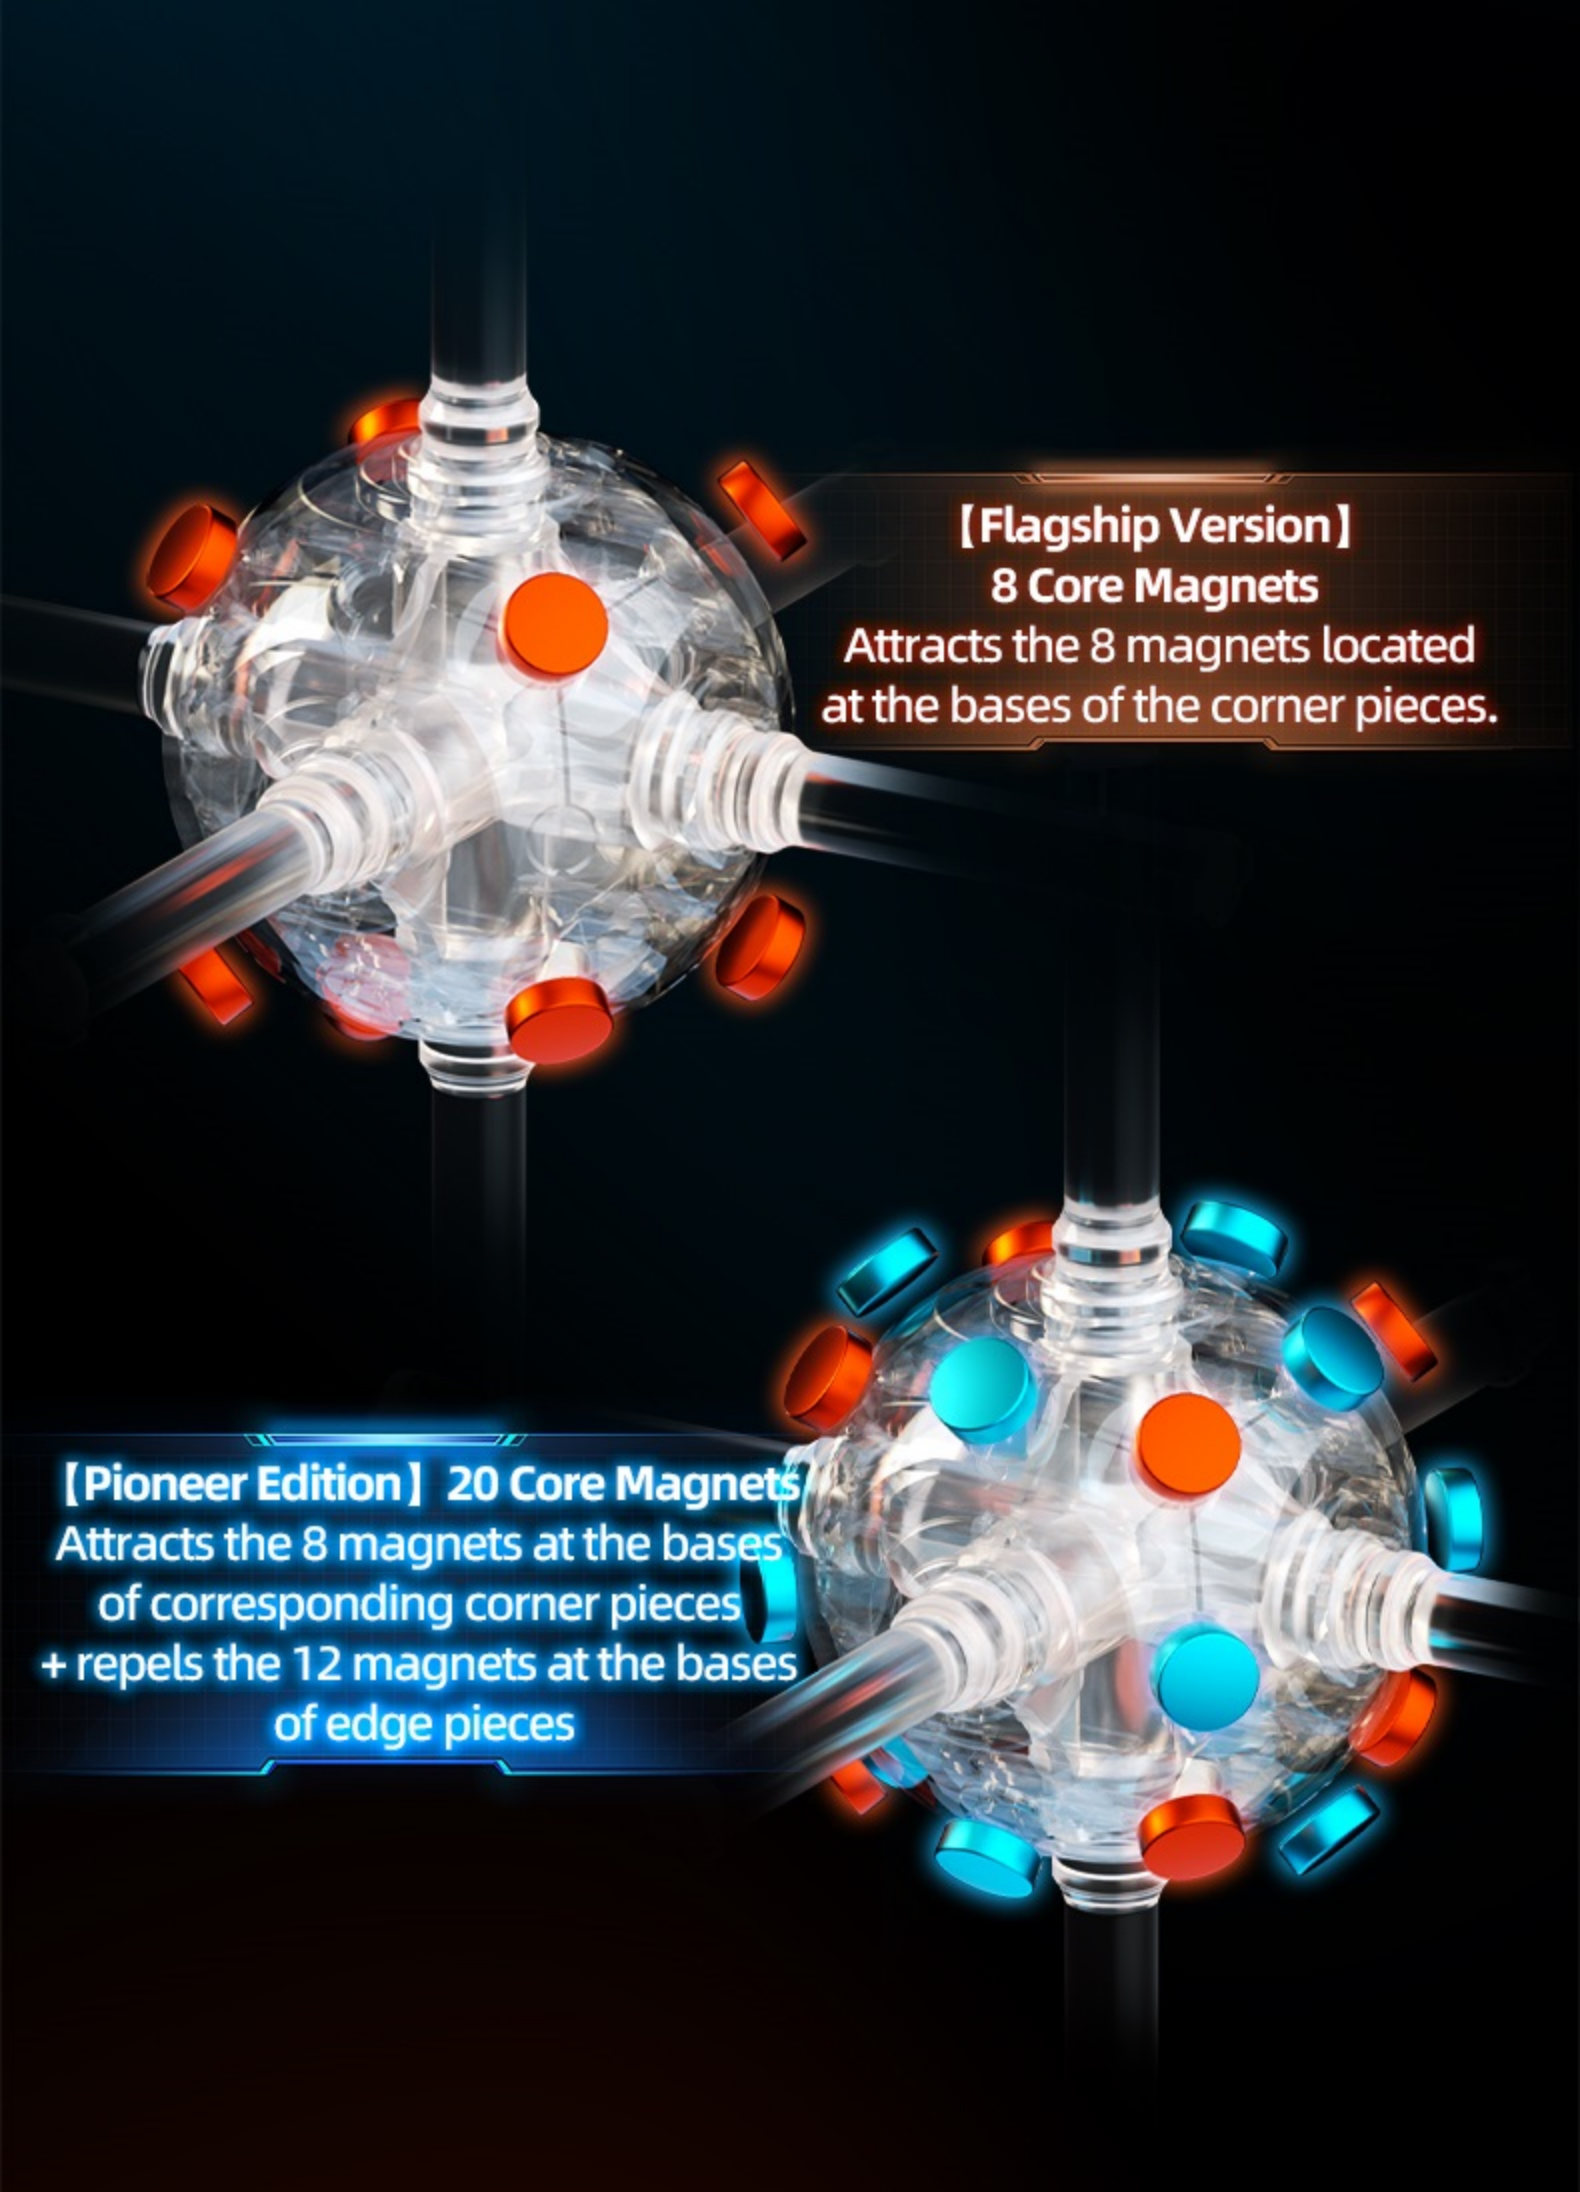

TORNADO V5

A Magnetic Field Built for Victory

8-Magnet / 20-Magnet Core Magnetic Positioning

A one-piece spherical core shell securely houses the magnets, solving the common issue of magnets falling out

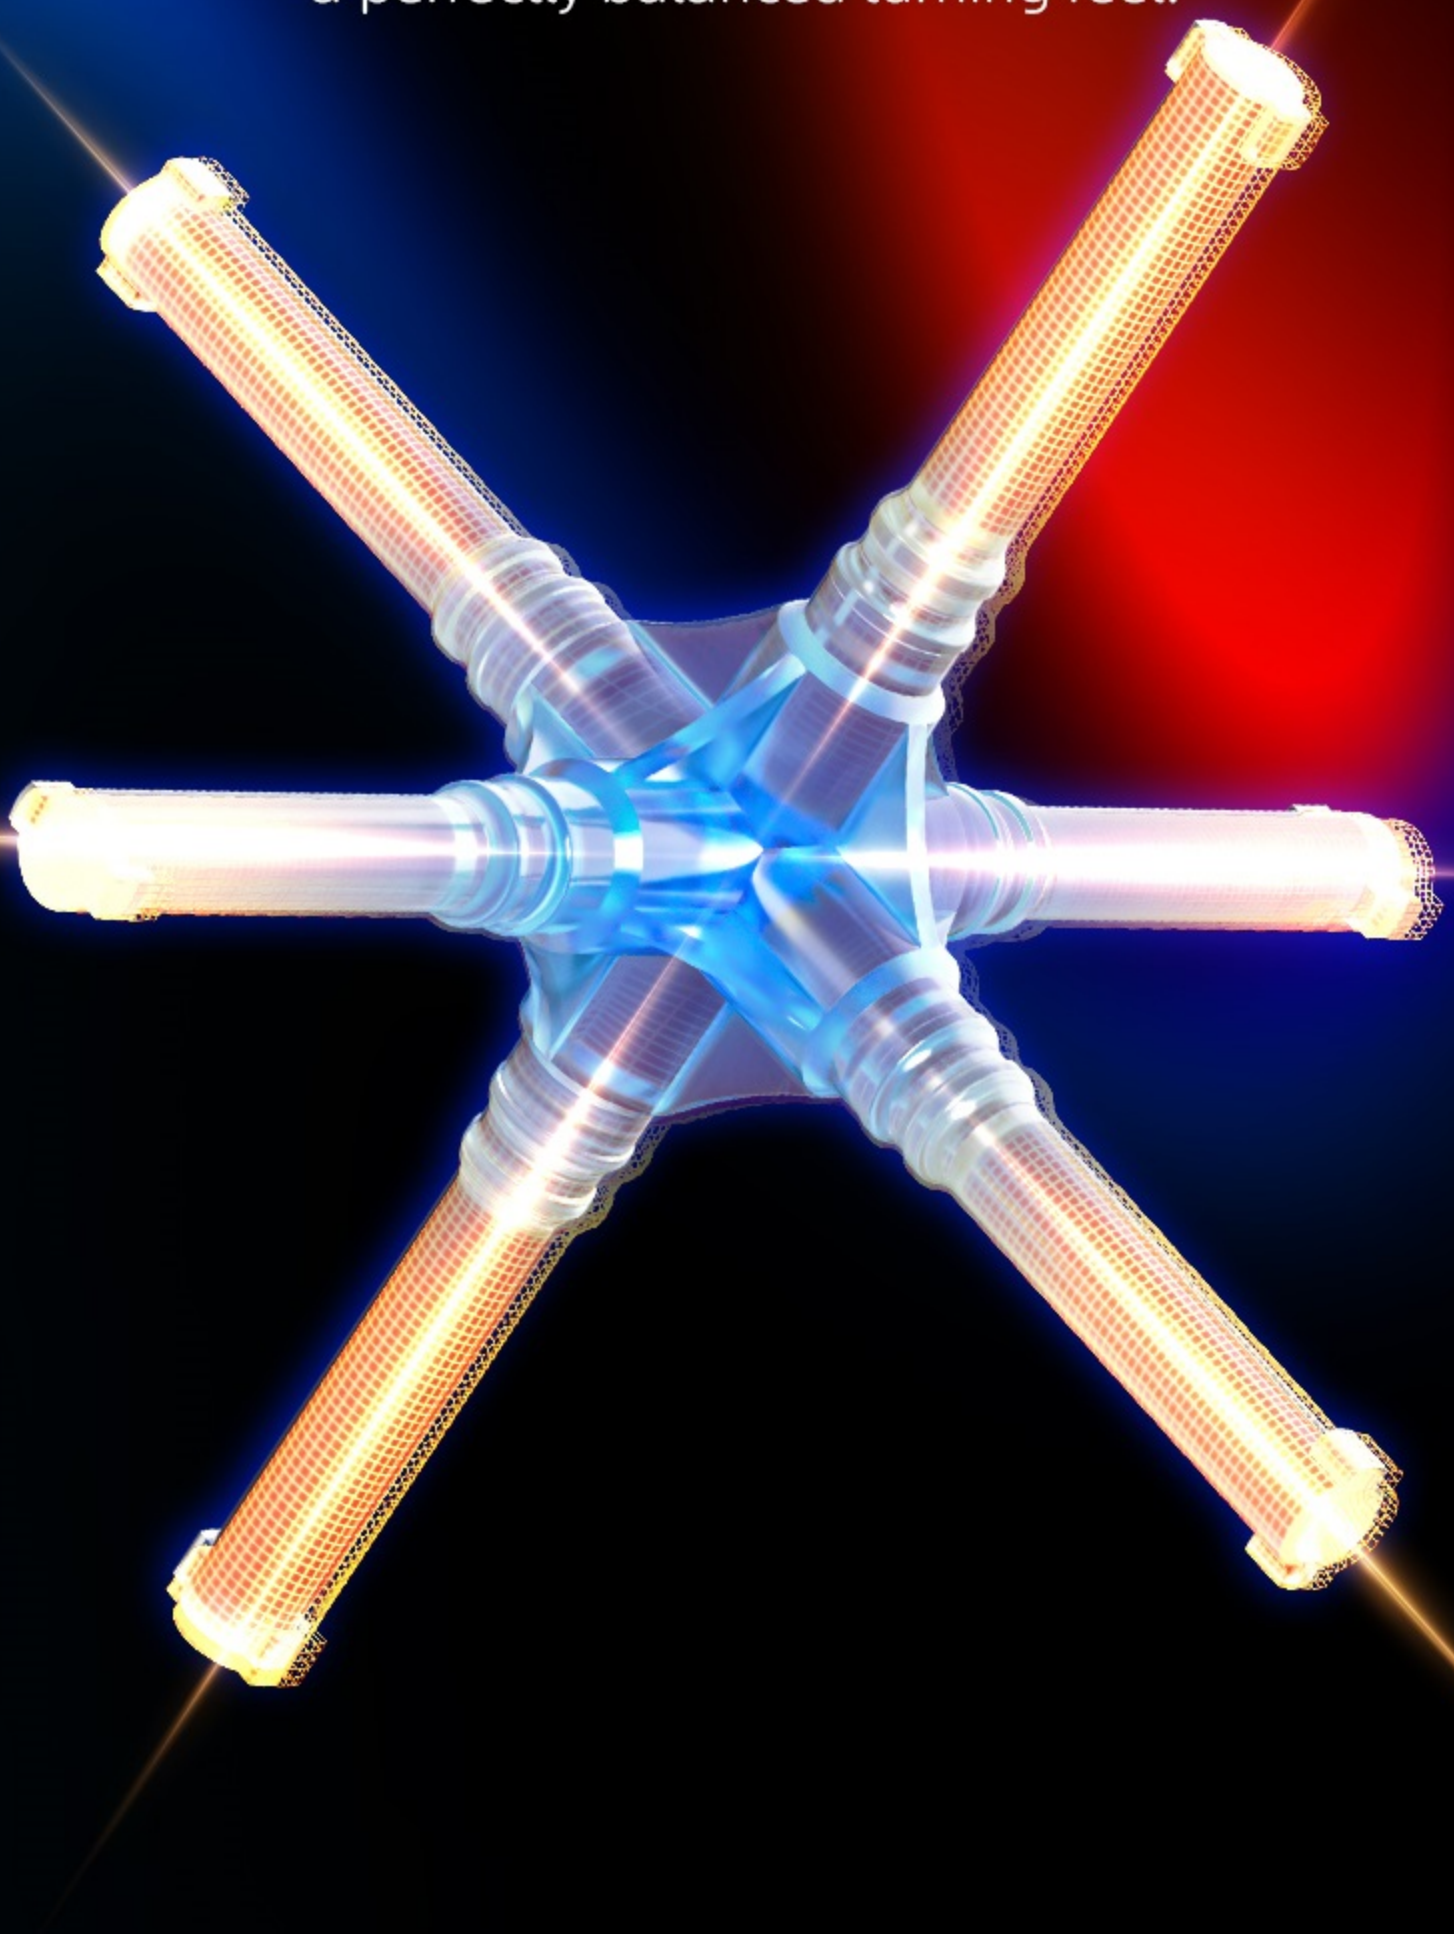

【Flagship Version】
8 Core Magnets
Attracts the 8 magnets located at the bases of the corner pieces.
【Pioneer Edition】 20 Core Magnets
Attracts the 8 magnets at the bases of corresponding corner pieces
+ repels the 12 magnets at the bases of edge pieces

TORNADO V5

Eliminating Core Breakage at the Source

One-piece Seamless Core
Maximum structural strength with zero tolerance for misalignment

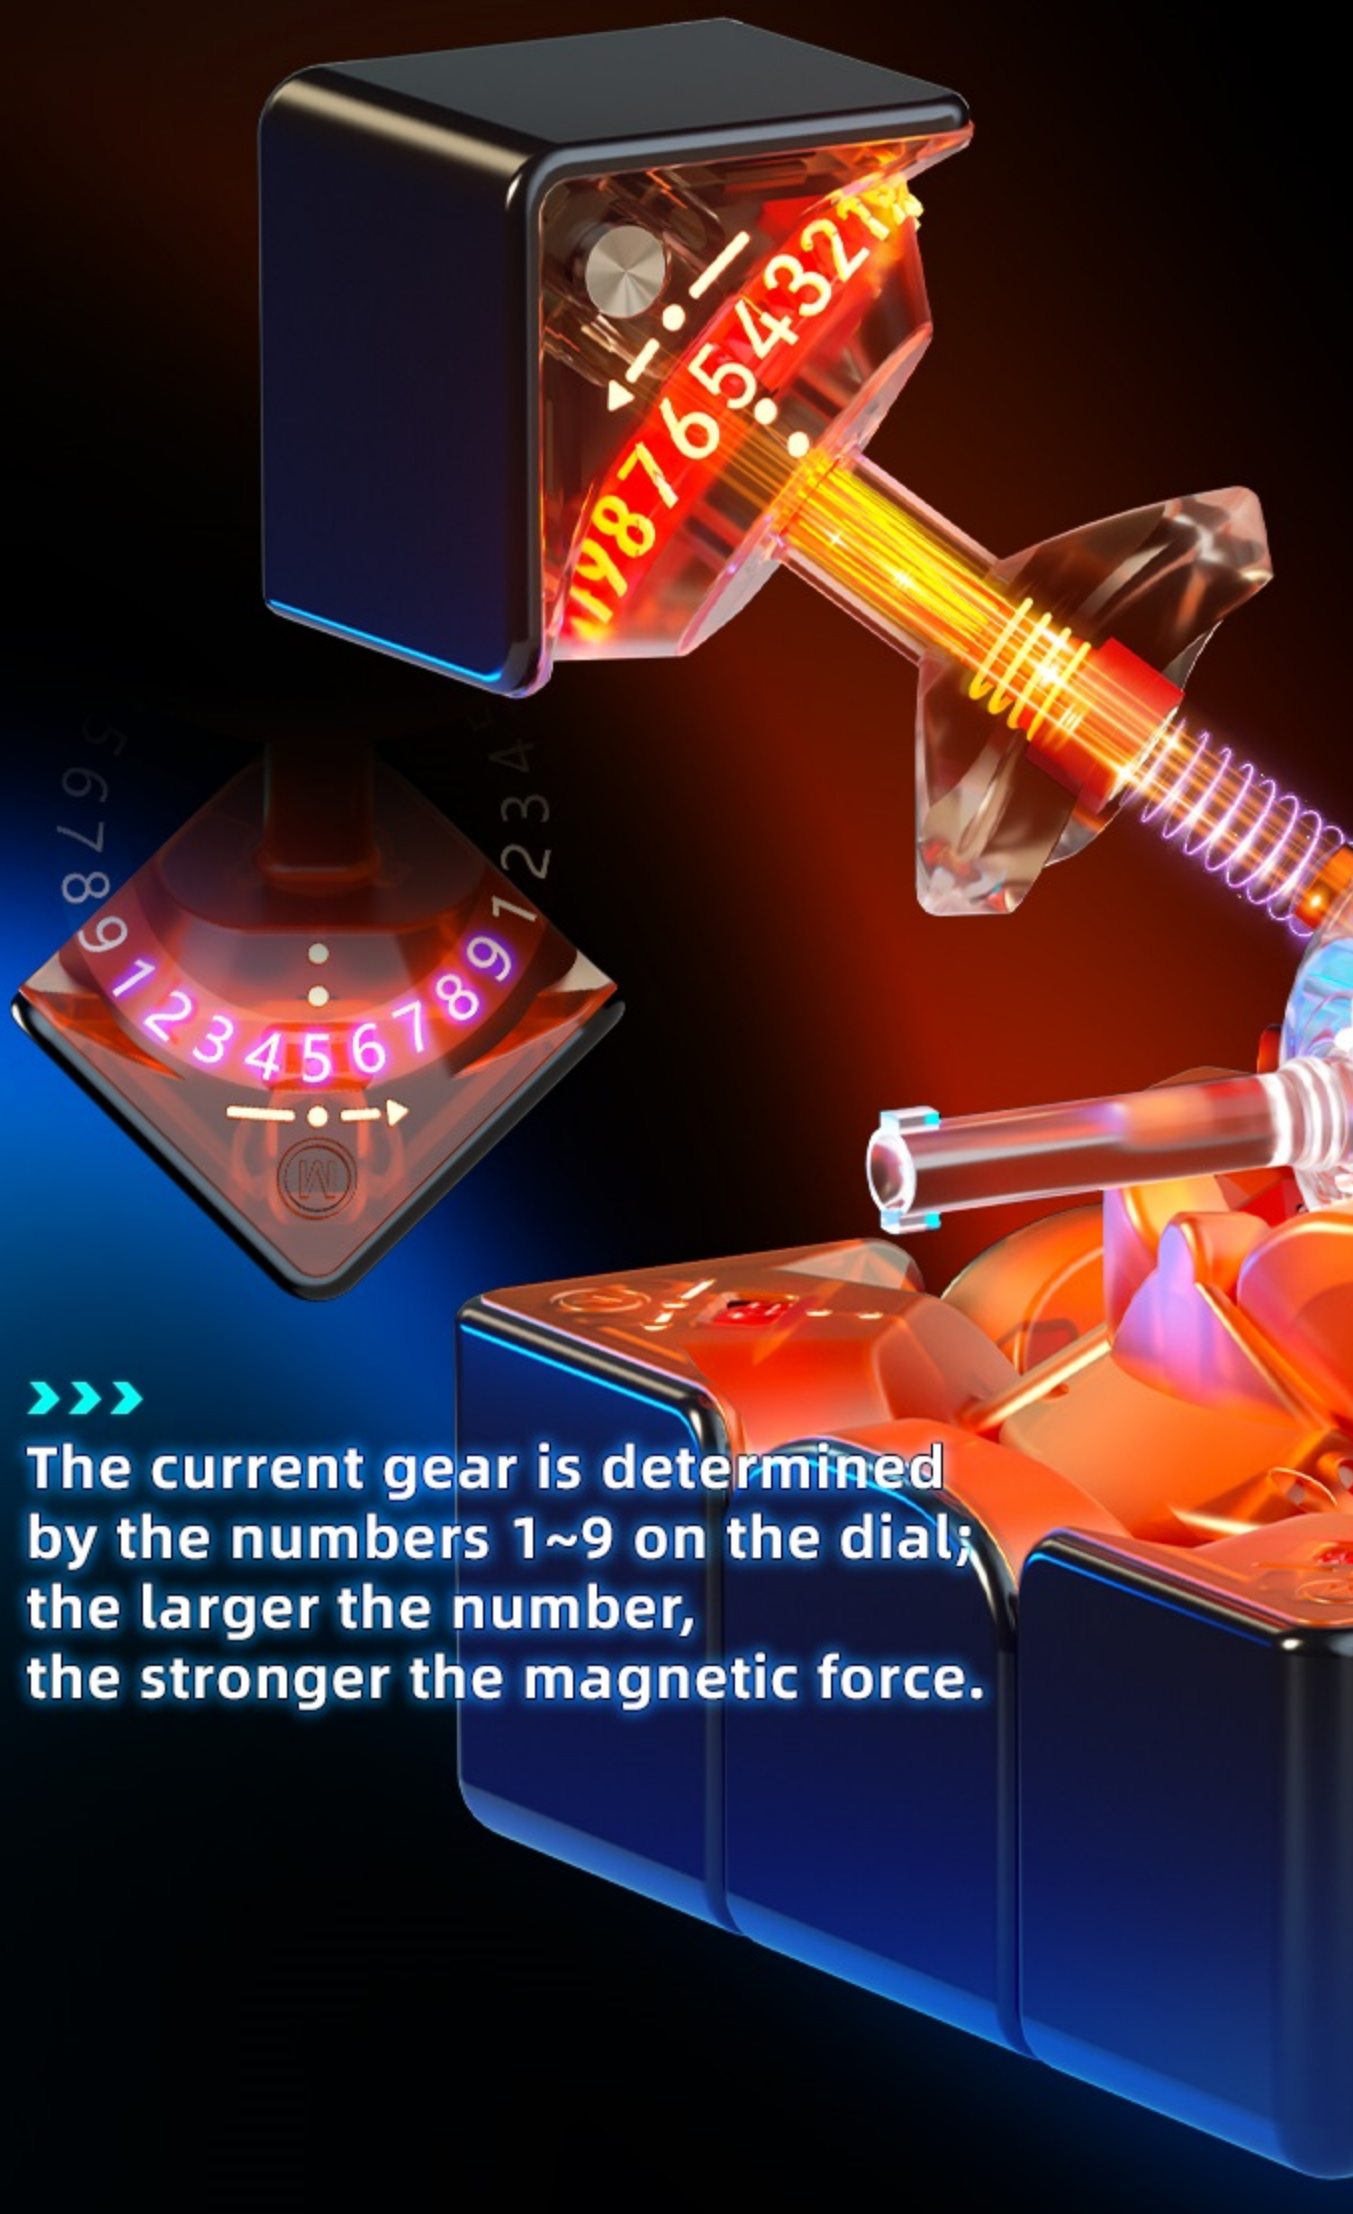

Under the same axis-distance setting,
all six faces maintain identical spacing – ensuring
a perfectly balanced turning feel.

TORNADO V5

Unlocking More Possibilities

Corner-core Magnetic Adjustment System
9 adjustable levels for fine-tuned performance

The current gear is determined by the numbers 1~9 on the dial; the larger the number, the stronger the magnetic force.

TORNADO V5

Adjust One Side. Sync the Entire Cube

1-Adjust-2 Edge Magnetic Adjustment System
7 adjustable levels with upgraded precision

›››
The arrow indicator shows the current setting—from “-” to “+”, magnetic strength gradually increases.

TORNADO V5

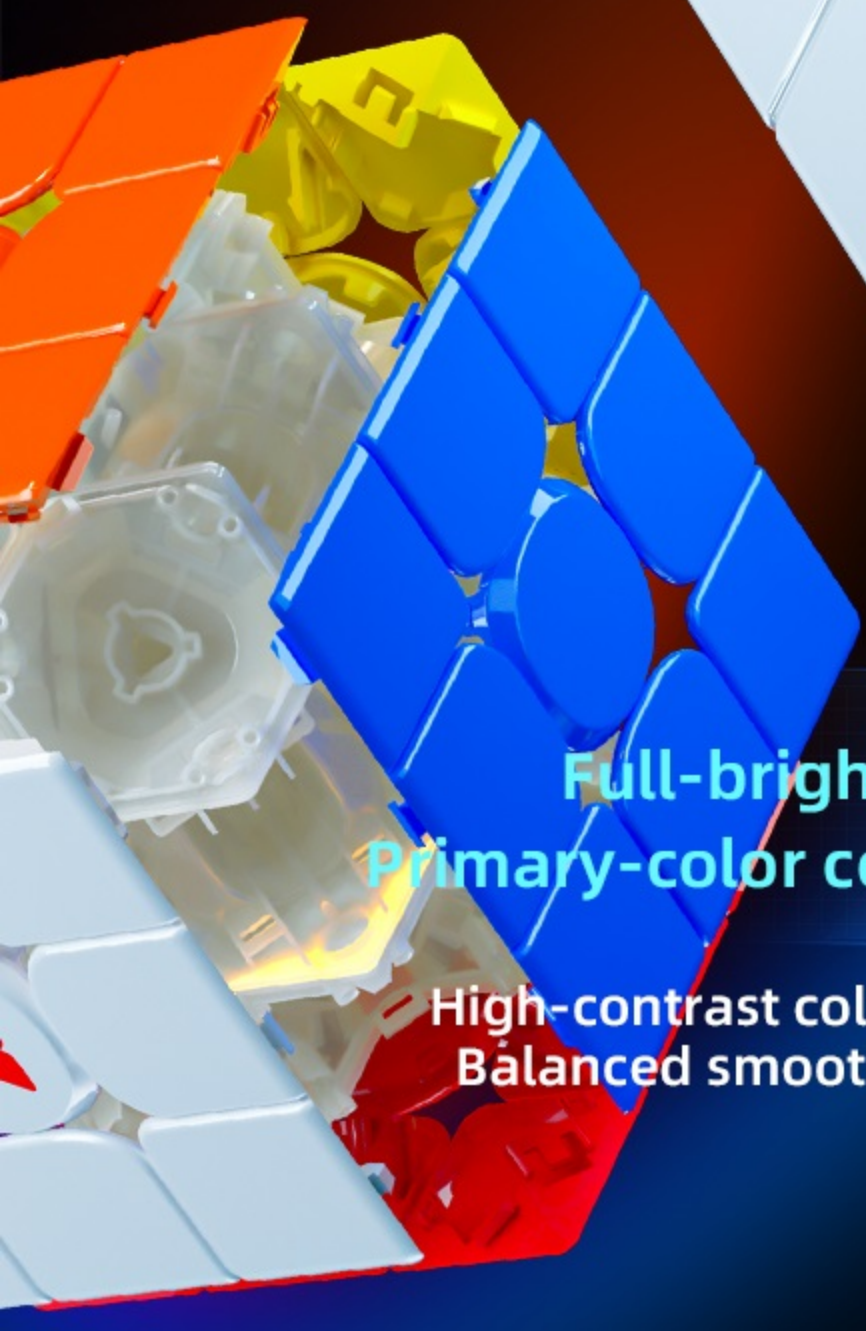

Flagship & Pioneer Editions Feature UV Diamond Coating

While pursuing striking aesthetics, the design remains firmly focused on performance and solving experience

UV Coating Brilliant shine that lasts like new

Scratch-resistant, wear-resistant, and highly glossy.

Full-bright six-color split tiles Primary-color core contact surfaces

High-contrast colors for faster recognition
Balanced smoothness and stable turning

TORNADO V5

Complete Tutorial Support Included
Step-by-step guidance designed to help you break throughlimits and continuously improve.
